Separate module-wise E2E and recognition performance

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Native complete: True · Corpus execution complete: False · ALL accuracy targets met: False

419 source-discovered native methods; 1676 actual native outcomes. 4752/4752 model observations. Four explicitly paired API34 profiles: light/dark × portrait/landscape. No model change or training in this baseline.

12. Settings and diagnostics

Accuracy targets fixed before execution: OCR CER≤0.20, normalized English speech WER≤0.35, silence must remain empty. These are measurement flags, not an assertion that every difficult input passes. Failures, hallucinations, errors and missing observations remain visible. Execution completion is not an accuracy pass.

Corpus, measurement and visibility boundaries

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

OCR:384 deterministic rendered conditions, 8 content kinds ×4 font families ×3 sizes ×2 polarities ×2 geometry/rotation settings. Two input sizes:1.12M/2.4M pixels. Input polarity is separate from app theme. Synthetic fonts are not physical photos/handwriting, universal scripts or the supplied private image.

Speech:200 distinct licensed CMU ARCTIC utterances,100 each KSP/SLT, four conditions plus four silence controls =804 inputs, repeated on four UI profiles. Only2 speakers, not804 people. English read speech; not spontaneous dictation, all accents, multilingual or microphone/noise capture. Default bundled Vosk is measured; large experimental Whisper corpus evaluation remains unqualified.

Ground truth is the original public transcript or generated source text, never the recognizer’s own clean output. Strict CER/WER retains errors; additional English normalized WER explicitly removes punctuation and case. Silence uses denominator1 count convention, not ordinary corpus accuracy.

Timing is emulator wall clock for recognition plus scoring and transcript codec/dedup/source-preservation checks; fixture synthesis excluded. First calls include cold initialization. Different CI hosts/load make physical-latency or causal theme-speed comparisons invalid. Report actual ms, bytes, pixels/audio seconds, RTF and sampled heaps; sampled heap is not peak process memory.

Visibility evidence: Native screenshots are paired by orientation and light/dark profile. Recorded resource assertions check real night/orientation. Screenshots support review, not automatic WCAG certification, vendor keyboard coverage or physical gesture approval.

Production runtime/models remain v57 baseline; this opt-in instrumentation source set and public assets never ship in the application. No private logs, supplied screenshots, notes or recordings enter Actions.

01. Notes and checklists

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

63 native methods assigned to this module. Captures are ordered by owning source workflow, then scene; actual selected profile outcomes follow.

Voice inbox and transcripts · doc-capture-language · portrait

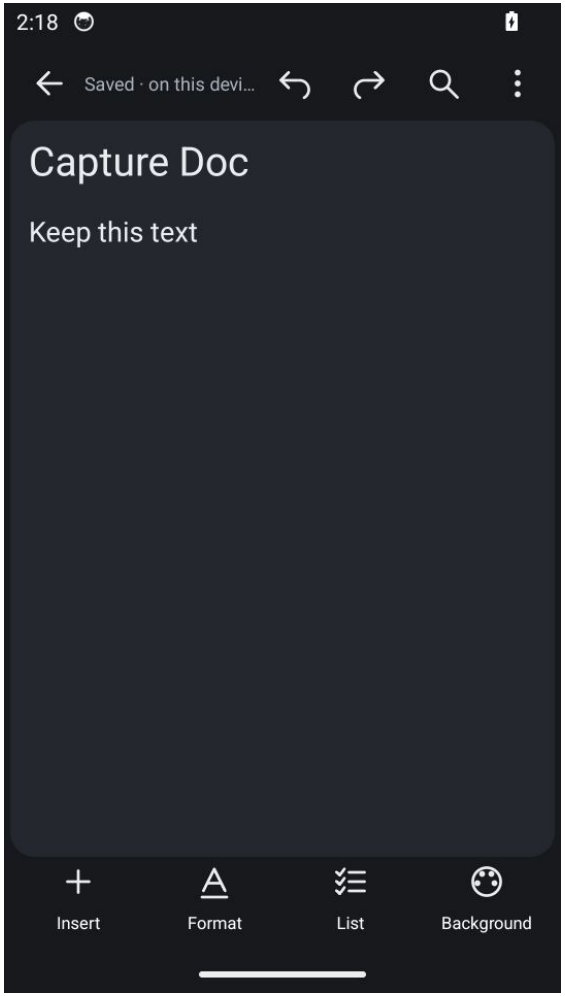

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Doc > image/voice capture
Capture results can append into the open Doc without flattening existing blocks. OCR language handling is automatic by default, while speech uses the selected offline engine. Review the result before insertion.
Boundary: The fixture name is historical; it does not mean the current default OCR requires a language-selection prompt.

Images and drawing · word-zoom · portrait

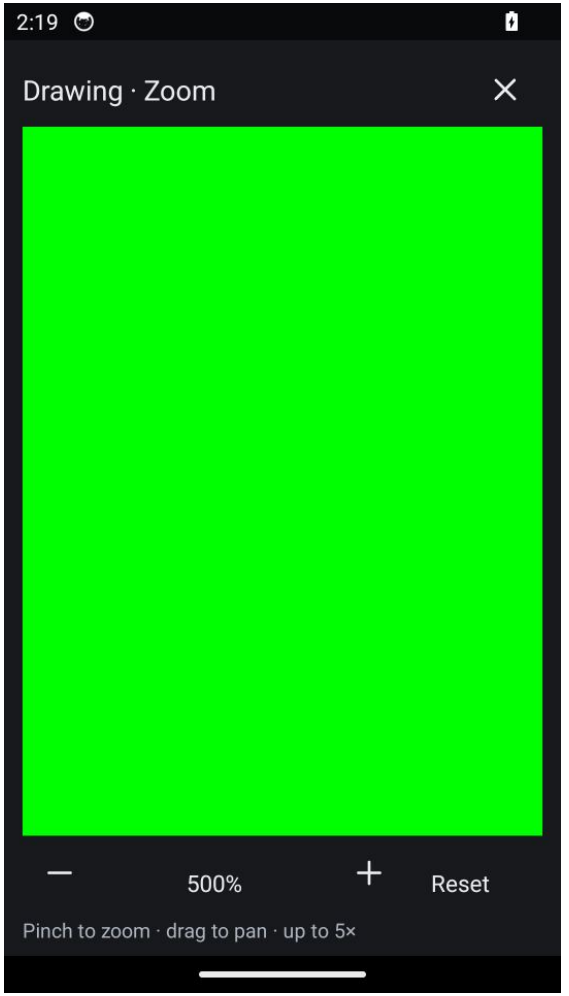

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Notes/Doc > embedded image or drawing > zoom
Exercise the embedded image/drawing preview zoom limits and preserve original image pixels and drawing kind. The historical scene identifier says word-zoom, but the owning test is an embedded-visual test, not an imported Word/PDF reader test.
Boundary: This frame must not be presented as proof of imported Word or PDF viewer fidelity. Real signed-reader captures are reported separately.

Home > board gesture
Swipe horizontally across the board to switch between Notes and Doc when no cards are selected. Use tabs as the direct alternative. A vertical gesture scrolls cards instead of changing workspace.
Boundary: A selected board uses selection actions; finish selection before workspace swiping. Respect reduced-motion settings.

Home, search and Library · search-keyboard · portrait

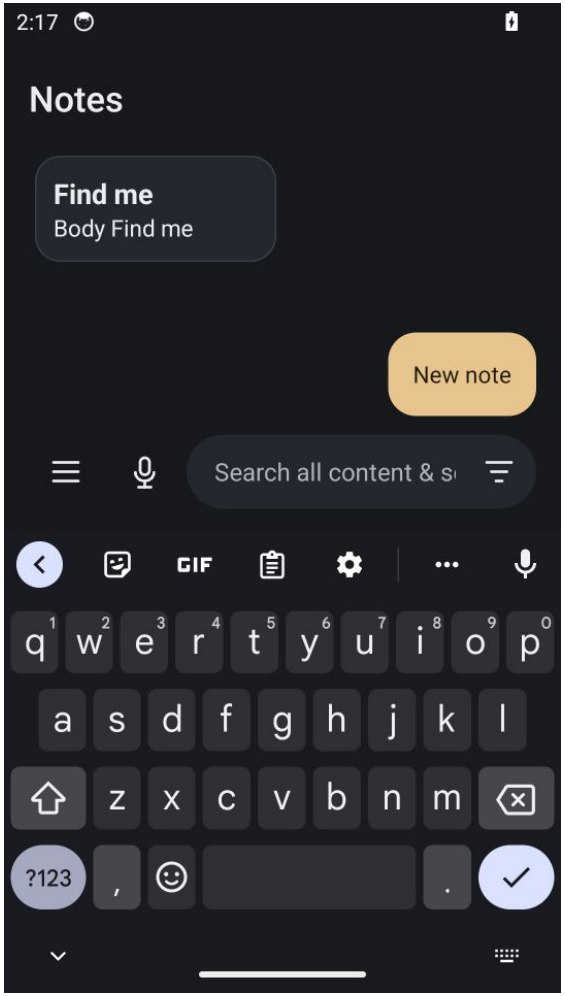

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Home > search field
Enter a distinctive title, phrase or setting name. Search covers saved content and the bounded Viewed files index. Review each result category before opening: saved Notes/Docs, viewed originals and Settings are different destinations.
Boundary: An empty result can reflect index limits or a changed file. Reopen the original to refresh its indexed text.

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Home > Filters > Folders
Browse folders without treating labels as disk directories. Choose device folder opens Android's local folder selection. Library > Folders is another entry point into folder browsing.
Boundary: A provider grant may be revoked or unavailable. Private content remains authoritative; do not clear app data to repair a missing external location.

light-portrait · app.space.notes.CoreJourneysTest#bottomSearchFieldAndFiltersUseFullWidthBelowCreation

app.space.notes.CoreJourneysTest#docChecklistConvertsWithoutMarkersAndUndoRestoresRows

Backup, history and Trash · document-content-options · landscape

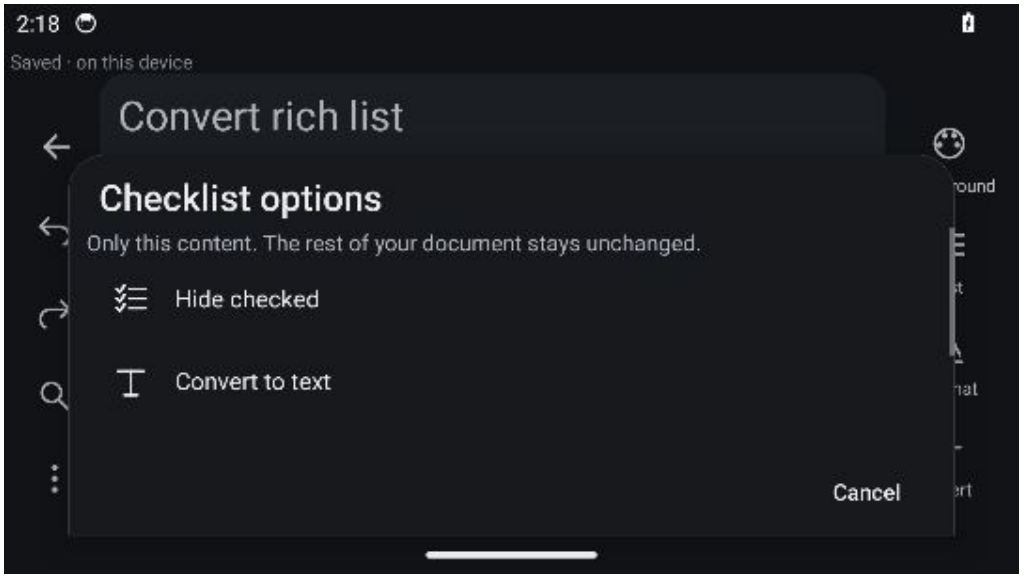

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Doc > object overflow
Open the local options for the selected block instead of applying note-wide actions. Rename/copy/cut/paste and placement operations are scoped to the chosen content where supported. Read confirmation text before removal.
Boundary: Clipboard object payloads and plain text have different fidelity. Do not promise unsupported external-app paste preserves native structure.

Reminders · reminder-date · portrait

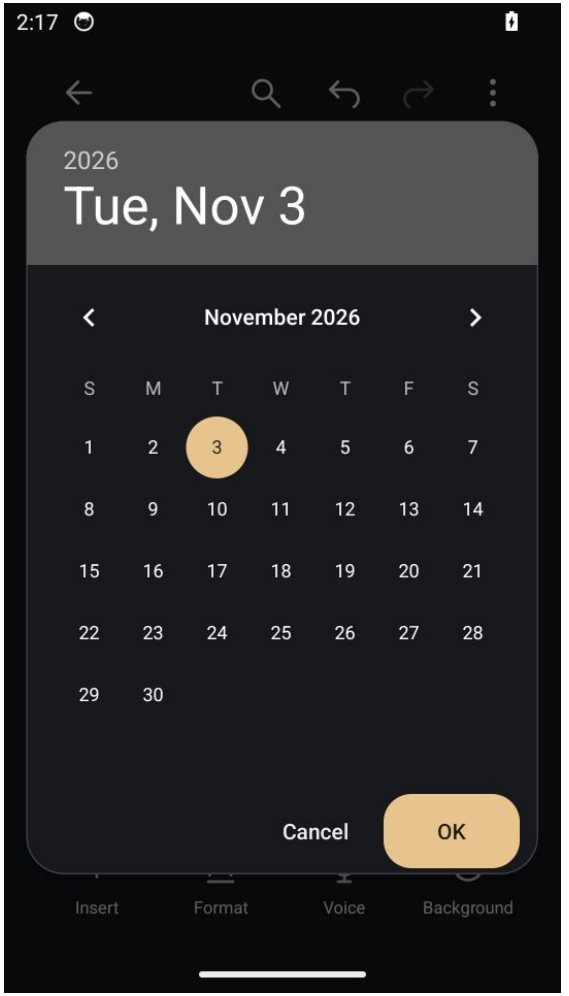

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Isolated themed Android DatePickerDialog
Render Android's actual date-picker type with NotesDesign, independent of notification permission gates. Confirming opens the isolated time picker; the workflow ultimately verifies the note's reminderAt remains zero.
Boundary: This is a native picker-theme test, not an executed note-reminder scheduling, permission grant or notification-delivery test.

light-portrait · app.space.notes.CoreJourneysTest#nativeSignatureShapeAndPickerDialogsRenderWithoutChangingReminder

dark-portrait · app.space.notes.CoreJourneysTest#nativeSignatureShapeAndPickerDialogsRenderWithoutChangingReminder

Settings and diagnostics · backgrounds · landscape

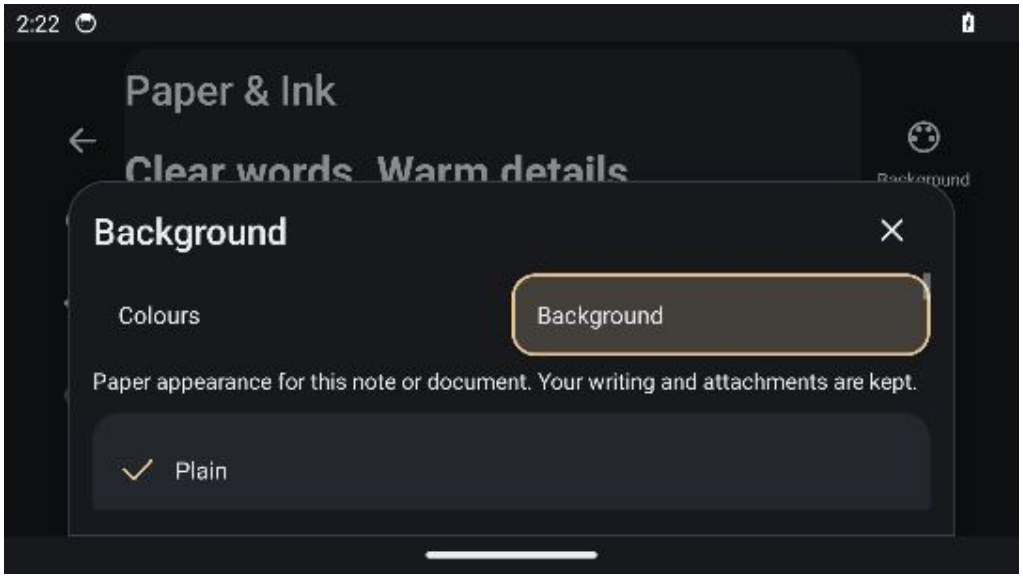

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Editor > Appearance > backgrounds
Choose a background treatment independently from note colour. Inspect contrast with existing links, drawings and checklist boxes. Keep a neutral choice for dense content if decorative patterns compete with reading.
Boundary: Background selection is presentation metadata; it must not flatten editable content into an image.

light-landscape · app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme

dark-landscape · app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme

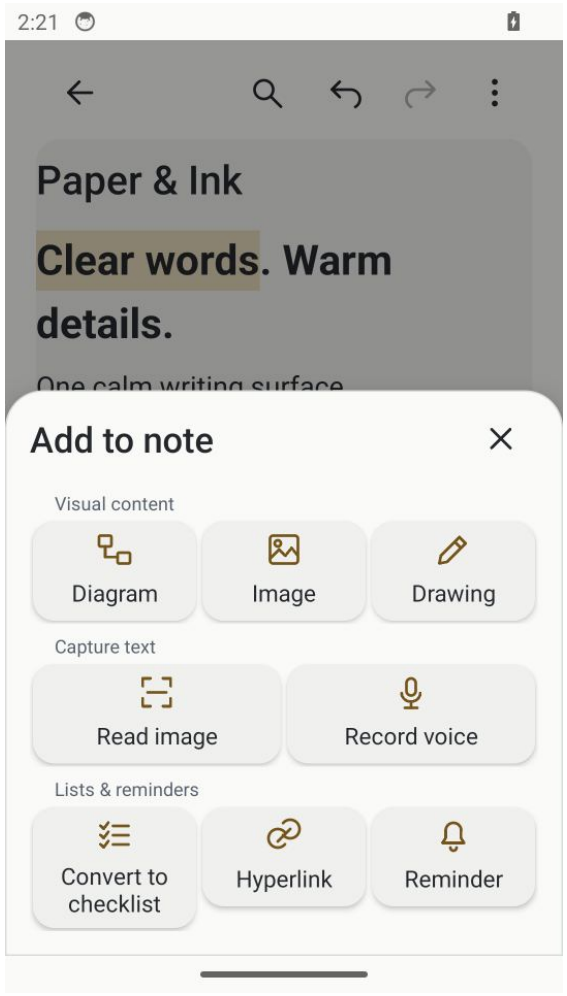

Settings and diagnostics · capture · portrait

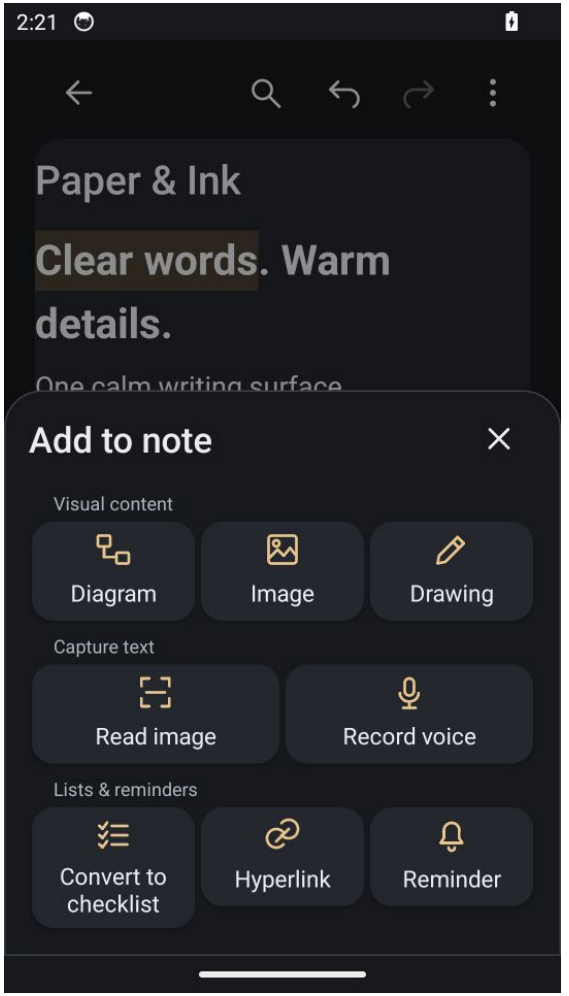

ACTUAL MODULE E2E · source dcd3e2c3cecd · no training / no physical acceptance

Editor/Home > capture tools
Choose image reading, drawing or voice capture according to the content you need. Capture produces a reviewable local result rather than silently replacing existing writing. Check the current note target before inserting.
Boundary: Mic permission is optional and should not be requested for unrelated text/image features.

Settings > Storage & recovery > App folder
Choose optional categories for a complete app recovery checkpoint in an empty selected App folder. Native content remains on device; selected copies provide additional recovery after reinstall and folder reselection.
Boundary: Portable note-only JSON and complete app checkpoints have different exclusions. Read selected categories before assuming audio/settings/history are copied.
