MyNotes · executed entire-app workflow audit

EXECUTED EVIDENCE · NOT A USER GUIDE

Candidate57 · version0.57.0 · Android builds and emulator execution in GitHub Actions only.

AUTOMATION GATE PASSED

1420/1420 native method outcomes reported across eight shards. 150 distinct captured scenes; 532 profile-specific images. The appendix includes every discovered native method, including unexecuted ones.

This is the newly executed report requested after physical candidate55 feedback, not the old116-page usage guide. All illustrated screens are synthetic CI screenshots. No supplied personal log, phone screenshot, note text, recording or private library was uploaded.

What this report can and cannot establish

Each illustrated page includes its route, purpose, owner test result and image hash. A passing assertion is not a physical usability sign-off. All discovered native tests and literal UI-title declarations are audited; uncovered branches, unpictured surfaces and physical/OCR/voice limits remain explicit.

Source: 38401d2c6c18334c3dcd20baea845930c6344a6b
Run: https://github.com/tarungittarun/TicTic/actions/runs/41591079488
Reader order: result summary → workflow groups → limitations/failures → illustrated traversals → complete method ledger → literal UI-surface inventory.

Execution environment and result accounting

EXECUTED EVIDENCE · NOT A USER GUIDE

current-api36: PASS · 215/215 · 0 failure records · 0 unexecuted/missing methods

current-api36-b: PASS · 204/204 · 0 failure records · 0 unexecuted/missing methods

min-api26: PASS · 215/215 · 0 failure records · 0 unexecuted/missing methods

min-api26-b: PASS · 204/204 · 0 failure records · 0 unexecuted/missing methods

landscape-api34: PASS · 151/151 · 0 failure records · 0 unexecuted/missing methods

landscape-api34-b: PASS · 140/140 · 0 failure records · 0 unexecuted/missing methods

large-font-api34: PASS · 151/151 · 0 failure records · 0 unexecuted/missing methods

large-font-api34-b: PASS · 140/140 · 0 failure records · 0 unexecuted/missing methods

Profiles are two disjoint method shards each: minimum API26; API34 landscape; API34 font2/night; current API36. Focused subsets are not every method on every profile. No tablet or ordinary portrait API34 execution is implied. Original PNG hashes and bounded JPEG preview hashes are retained in provenance.json.

Independent raw APK and JVM verification

EXECUTED EVIDENCE · NOT A USER GUIDE

MyNotes-v0.57.0-57-development.apk
155163096 bytes · app.space.notes · version0.57.0/code57 · minSDK26 · targetSDK34

Raw APK SHA256 2bf60ea6029439437b2a6c0af8a24dccb5962543d43fec3b4ab2184affc7f2a1
Stable signer certificate SHA256 08cd7d693078ef665b7acd427d71fa3aa477cc6af2cab2a00c310f9d66198fca

Exact executed JVM gate: 317 passed; native 1420 outcomes / 419 distinct methods. The verifier independently downloaded the already-built raw artifact and foundation report; no local Android build or APK reconstruction.
INTERNET permission: absent. Development artifact, not public-release approval. Artifact expiry: 2026-11-10T06:43:36Z.

Download: https://github.com/tarungittarun/TicTic/actions/runs/41591079488/artifacts/13210751326
Already-built development APK byte/signature/manifest verification only; does not replace native qualification or physical install-over acceptance.

Exact-byte upgrade and actual process recovery

Source-matching raw APK SHA256 2bf60ea6029439437b2a6c0af8a24dccb5962543d43fec3b4ab2184affc7f2a1

Install-over fixtures are public synthetic Note/Doc content. They do not establish physical user-library acceptance, arbitrary rich-data migration or complete folder-recovery correctness.

Reader process recovery: PASS · API34 · code57

ReaderRecovery.pdf · PID 4009 → 5127 · query restored=True · page2=True · visible row=None · original unchanged=True

ReaderRecovery.docx · PID 5127 → 5854 · query restored=True · page2=True · visible row=None · original unchanged=True

ReaderRecovery.csv · PID 5854 → 6387 · query restored=True · page2=False · visible row=40 · original unchanged=True

Actual emulator background-process kill and retained-task relaunch: PDF/Word page+query and CSV query+visible row, fixed public fixtures. Not image OCR recovery, zoom pixel proof, exact Office fidelity, physical acceptance or exhaustive migration.

Real diagnostic file save: True · 123 bytes · readback SHA256 1064763f626cb87815b54b5b16d7a441cfd0e54f536cbf23ec55388525b10bc4 · contents intentionally not included.

Physical55 feedback · disposition and proof boundary

EXECUTED EVIDENCE · NOT A USER GUIDE

Viewed files search / count / file icons
Search matches bounded indexed text; counts and type badges replace gear rows. See the seeded-index search/count/no-match workflow and fresh screenshots.

TXT controls / screen space
Permanent secondary buttons were moved to Text file options; navigation and Find stay in one compact viewer row. Real SAF tests retain lossless pages, explicit copy and unchanged originals.

Rearrangement / accidental Doc switch
Gesture lifetime suppresses workspace swipes even after drag cleanup; late board refreshes are deferred and target bounds follow scrolling. The actual native hold/drop test injects a late refresh. Physical top-edge precision remains open.

PDF / Word / sheet presentation
Redundant48dp metadata rows are removed; details remain in overflow. Existing page selection, zoom, Find, counts, sharing and original-byte tests remain selected. Word is still approximate.

Inserted numbered point
New Notes and Doc workflows insert a middle point and assert downstream literal renumbering, caret, formatting and saved text, including9→10 digit-width changes.

Voice inbox click / progress
The card now toggles existing playback and displays Preparing playback while loading; seek/pause/stop remain. Existing transport tests do not independently assert every new whole-card tap target. No physical voice-quality claim.

Read image misses text / false language
Sparse segmentation is always compared for bounded coverage improvement. This is not training or a demonstrated correction of the supplied image. False-script accuracy remains OPEN.

Optional log file saving
Diagnostics now explicitly says Save diagnostic log as a file. It uses the existing user-initiated Android create-document path; filtered saving remains. Screenshots alone are not proof of a completed real destination write. The separate signed-release diagnostic-save record reports real file readback only when that complete workflow passed.

Entire-app executed report
All source-pinned native outcomes and distinct captured pages are included below, with unresolved owners and unpictured surfaces explicit.
Passing automation is not blanket physical sign-off.

End-to-end workflow map · execution, not promises

EXECUTED EVIDENCE · NOT A USER GUIDE

Home / Notes / Doc / Library

Workspace tabs, native search, selection, pins, filters and user arrangement retain content and return correctly.
Linked native methods (overlapping groups): 37; PASS 37, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Notes writing / formatting

Edit text; preserve font, size, colours, paragraph styles, selection, lists and downstream numbering through save/reopen.
Linked native methods (overlapping groups): 30; PASS 30, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Doc writing / mixed content

Insert at the caret; retain independently editable rich text, checklists, media, table and diagram blocks; Undo/Redo retain structure.
Linked native methods (overlapping groups): 44; PASS 44, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Checklists / tables / hyperlinks

Scoped cell/row editing, insertion, selection conversion, movement and link actions do not flatten neighbouring content.
Linked native methods (overlapping groups): 40; PASS 40, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Drawing / image editing / diagrams

Drawing tools and shape transforms preserve stored source detail; shape/group operations remain scoped.
Linked native methods (overlapping groups): 62; PASS 62, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Read image / OCR

Local bounded recognition, image-coordinate selection, review and cancellation retain source images. Synthetic correctness is separate from real-image accuracy.
Linked native methods (overlapping groups): 38; PASS 38, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Voice recording / inbox / playback

Optional microphone, interruption, original retention, seek/pause and transcript recovery operate offline.
Linked native methods (overlapping groups): 28; PASS 28, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

TXT / PDF / Word / spreadsheets / Viewed files

Read-only originals never silently become Home notes; Find, counts, pages and explicit copy preserve original bytes.
Linked native methods (overlapping groups): 34; PASS 34, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Folders / storage / optional copies

Authoritative private content survives absent/broken providers; folder changes and explicitly reviewed recovery preserve conflicts.
Linked native methods (overlapping groups): 64; PASS 64, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Backups / portable documents / history

Validation precedes replacement, restore/checkpoints preserve data, and unsupported inputs fail without destructive migration.
Linked native methods (overlapping groups): 65; PASS 65, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Archive / Trash / bulk operations

Archive differs from Trash; restore, Undo and confirmed permanent operations respect selection and retention.
Linked native methods (overlapping groups): 30; PASS 30, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Settings / diagnostics / models / styles

Local preferences, opt-in bounded diagnostics, saved styles and explicit file export preserve privacy.
Linked native methods (overlapping groups): 23; PASS 23, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Reminders / widget / Android integration

PendingIntent identity, permission behaviour and OS surfaces preserve note intent; launcher/vendor behaviour still needs physical checks.
Linked native methods (overlapping groups): 15; PASS 15, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Environment / motion / lifecycle / soak

Actual configured themes/fonts/orientation/motion and recovery boundaries are verified rather than inferred from profile names.
Linked native methods (overlapping groups): 21; PASS 21, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Export PDF / semantic codecs

Exported geometry, annotations and structured content are independently validated; successful export does not prove original Word fidelity.
Linked native methods (overlapping groups): 60; PASS 60, FAIL 0, UNEXECUTED 0. Exact method/profile ledger follows.

Open limitations and physical acceptance

EXECUTED EVIDENCE · NOT A USER GUIDE

Physical drag and selection
New native long-hold regression also injects a late board refresh while held. It does not certify exact placement, top-edge control or perceived animation smoothness on your phone.

OCR accuracy — OPEN
The supplied image misses text and invents other-script characters. This candidate compares automatic/sparse segmentation for better coverage, but that is not training or proof that your image is fixed. Universal fonts, languages, emoji and arbitrary screenshots remain unqualified.

Voice accuracy / audibility — OPEN
You have not physically tested the recent voice changes. Synthetic recognition/playback outcomes do not establish real microphone quality, Indian-accent generalisation, noise removal or physical loudness.

Viewer limitations
TXT Find is current-page only; Viewed files uses a bounded, possibly partial index. Word pages remain approximate. Rotated/scanned PDF selection differs from embedded, unrotated text. Spreadsheet rendering is cached values, not Excel fidelity.

Physical user library / migration
No private attachment, library or screenshot is uploaded to CI. Synthetic storage fixtures cannot establish acceptance of your actual pending-folder difference. Install-over and process-death proofs must be separately run for the exact candidate; earlier candidate55 proofs do not qualify56.

UI inventory boundaries
This report includes every screenshot actually captured and all selected native method outcomes, not a claim that every possible dialog, error, provider, language, permission combination and vendor page was visited. Unpictured source surfaces are explicitly listed.

System pages / external applications
Some controller journeys use a test NotesHost to observe a request instead of opening another app. Real SAF provider tests are separately identified. No successful mock host callback is presented as actual Android Save/Share/launcher completion.

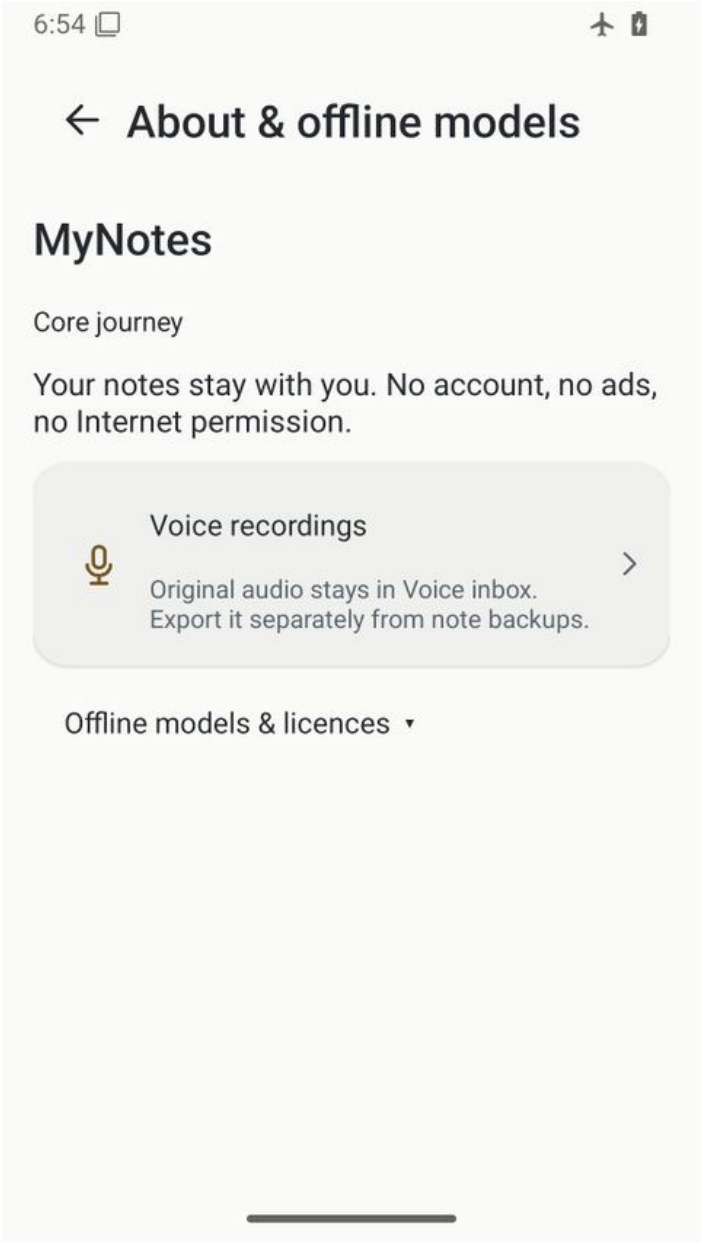

Illustrated traversal · screenshot index

EXECUTED EVIDENCE · NOT A USER GUIDE

Use the PDF bookmarks to jump to each captured page. The displayed image is one named profile; all captured variants remain in the evidence manifest. Screens shown before a later method failure remain explicitly labelled with that failure.

Captured page · e2e-about-models

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Settings > About & offline models

Show local version, offline feature/model information and licence/disclosure content; return to Settings.

Expected / actual
Assertions in wholeAppSettingsTraversalRecordsEachVisitedPage.
Owner method outcome: PASS

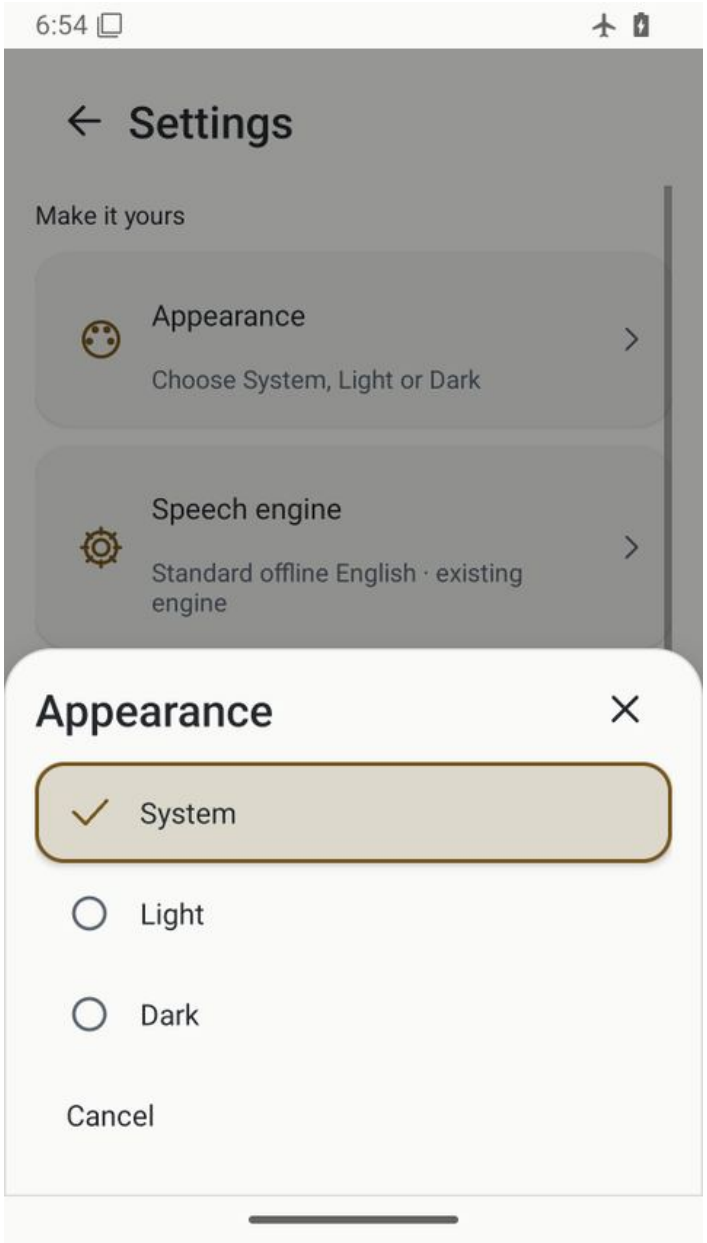

Boundary: A displayed model licence/version is not recognition-quality certification.

Owner: app.space.notes.CoreJourneysTest#wholeAppSettingsTraversalRecordsEachVisitedPage
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Captured page · background-editor

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Editor > saved background

The writing surface reflects the chosen background while native text remains editable. Scroll and type normally. Use Undo for content edits; use appearance choices when you only want a different visual treatment.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

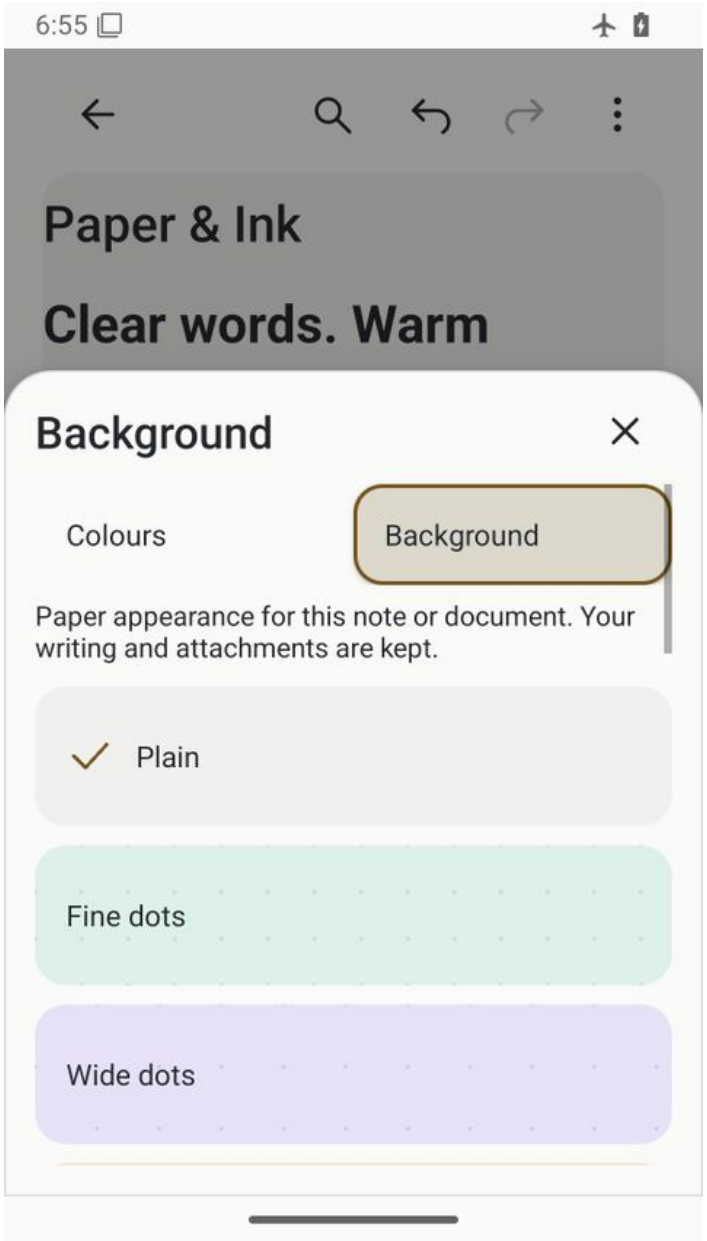

Boundary: An appearance change should not be used as evidence that a pending content write completed.

Owner:
app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · backgrounds

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Editor > Appearance > backgrounds

Choose a background treatment independently from note colour. Inspect contrast with existing links, drawings and checklist boxes. Keep a neutral choice for dense content if decorative patterns compete with reading.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

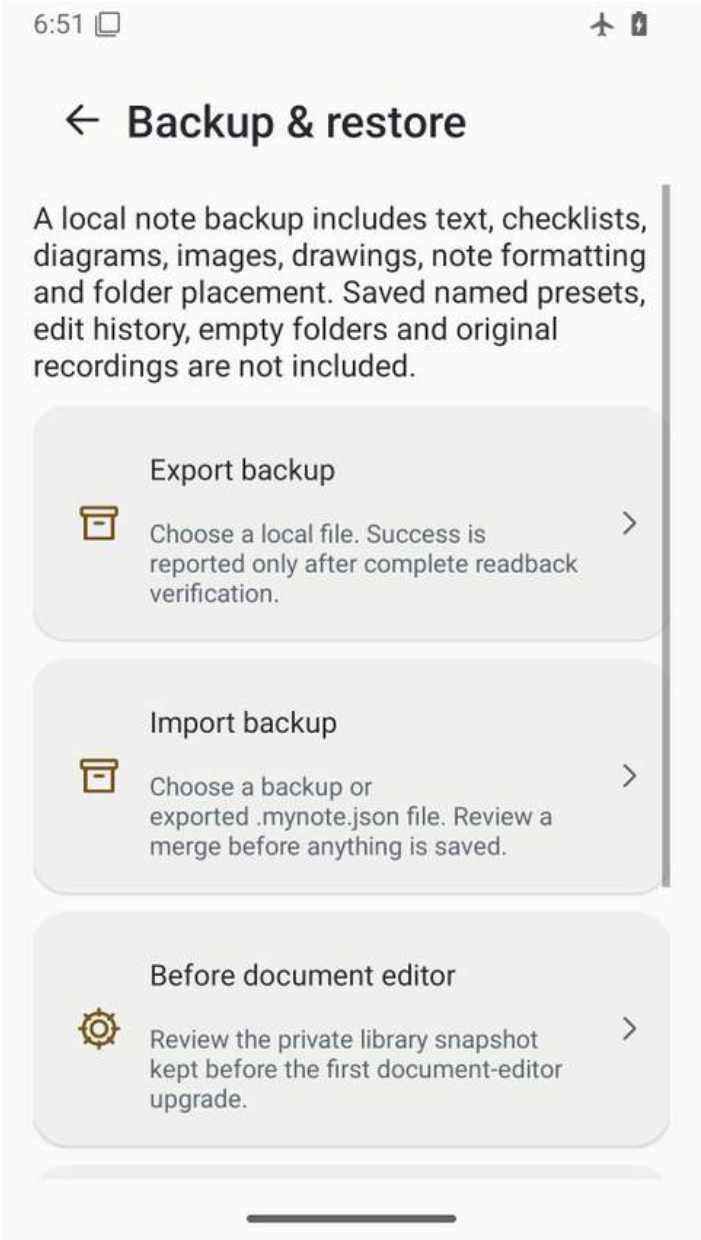

Boundary: Background selection is presentation metadata; it must not flatten editable content into an image.

Owner:
app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · checklist

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Notes > Library > Checklist

Create a list, write each item and tap a checkbox to change completion. Item controls provide indentation/reordering where available. The list title is distinct from item text. Keep completed items hidden only when you intentionally choose that view.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

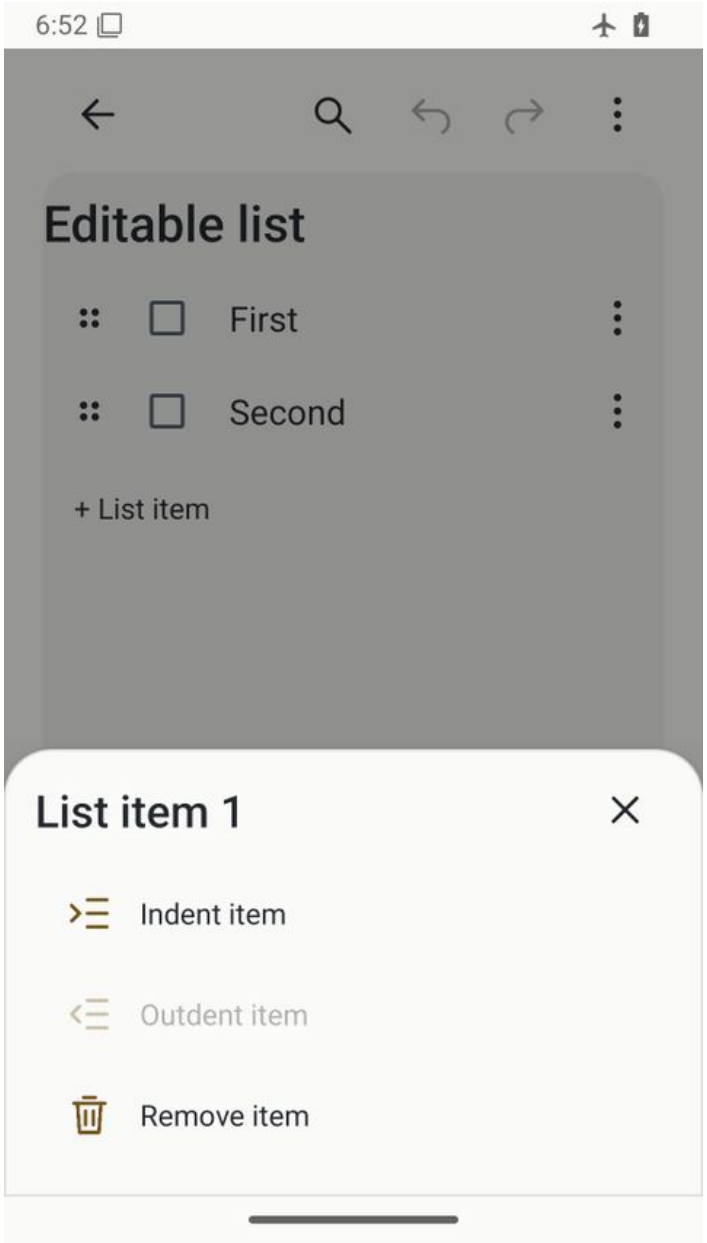

Boundary: Hide checked is not delete. Existing item IDs, completion and indentation should survive saving and re-opening.

Owner:
app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · document-typing-style

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Doc > Format > saved styles

A saved style stores formatting choices, not note text. Apply it to a selected range or compatible typing position. Choose meaningful names so a later document does not receive an unexpected font/size combination.

Expected / actual
Assertions in explicitTypingFormatSurvivesRecreationWithoutStylesOrMoreMenus.
Owner method outcome: PASS

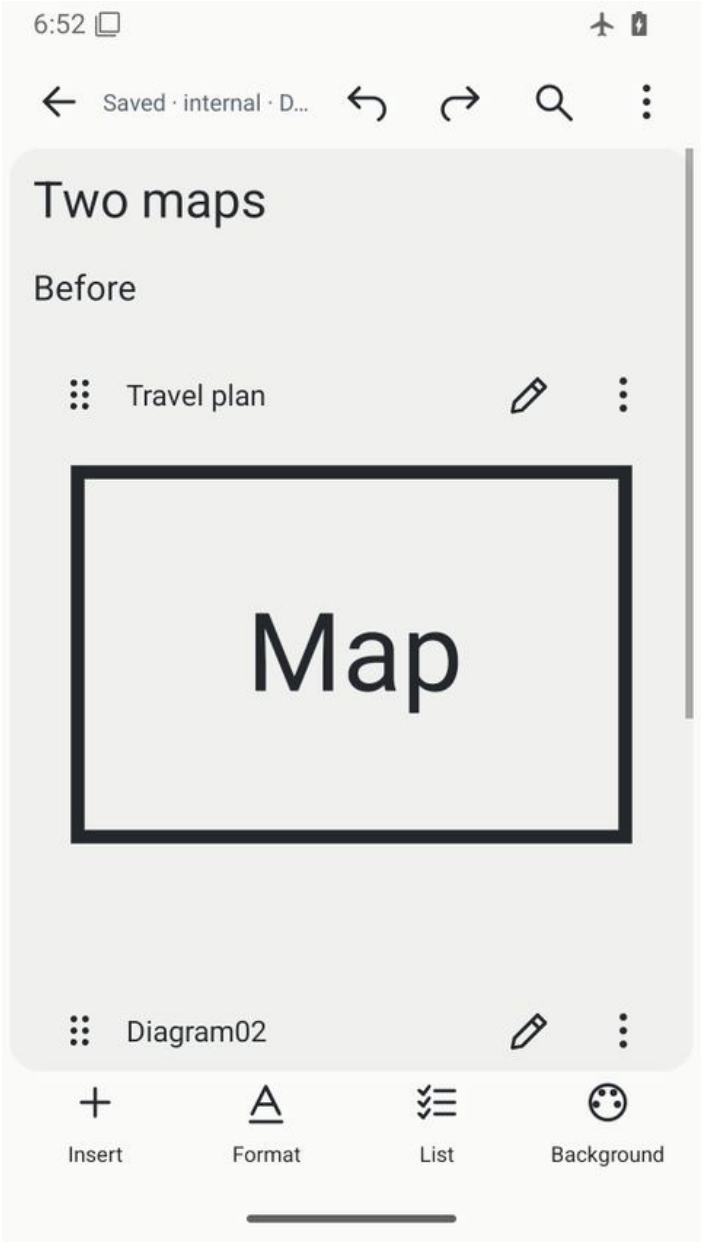

Boundary: Saved styles are local settings. Portable note-only backups do not imply all profile settings were included.

Owner:
app.space.notes.CoreJourneysTest#explicitTypingFormatSurvivesRecreationWithoutStylesOrMoreMenus
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Editor/selection > Labels

Assign labels to organise content across folders. Use clear names and verify the intended note/selection receives them. Filters match any selected label. Rename and removal should not alter unrelated writing.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

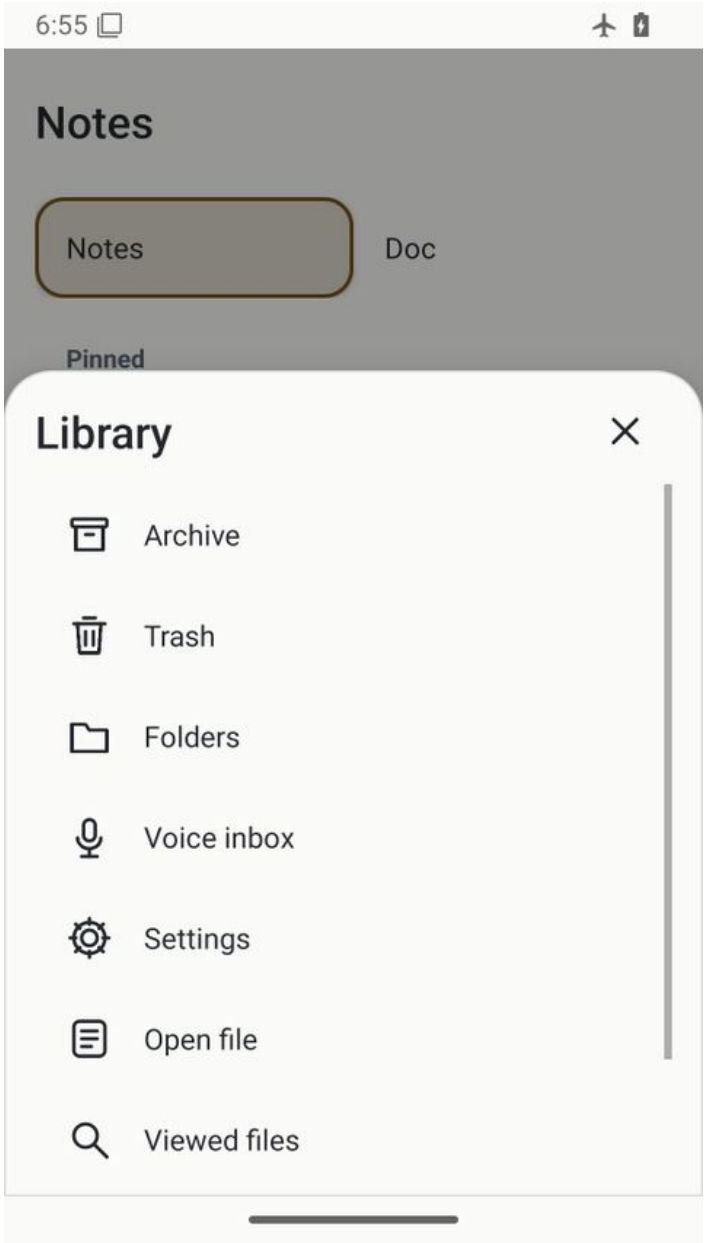

Boundary: Labels are metadata, not device directories or a substitute for verified storage location.

Owner: app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · library

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Home > Library

Open secondary destinations: Archive, Trash, Folders, Voice inbox, Settings, Open file and Viewed files. Notes and Doc remain Home workspace tabs rather than duplicate Library rows.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

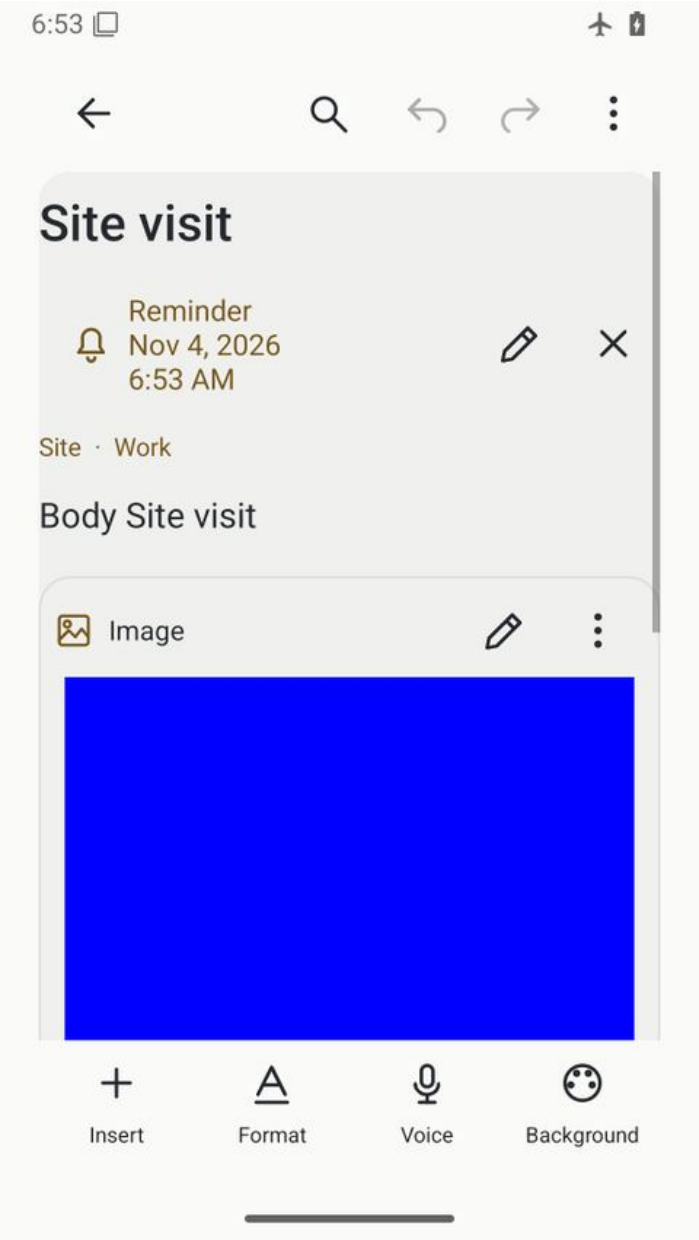

Boundary: This is a fresh current candidate capture, not the historical code41 menu used in the earlier handbook.

Owner:
app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · mixed-note-header

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Note containing rich blocks

A Notes-workspace item may contain selected-text checklist blocks and other rich content while remaining a Note. The header and toolbar should reflect the actual workspace, not assume every rich block means Doc.

Expected / actual
Assertions in mixedContentPropertiesComeBeforeWritingAndRemovalKeepsOtherItems.
Owner method outcome: PASS

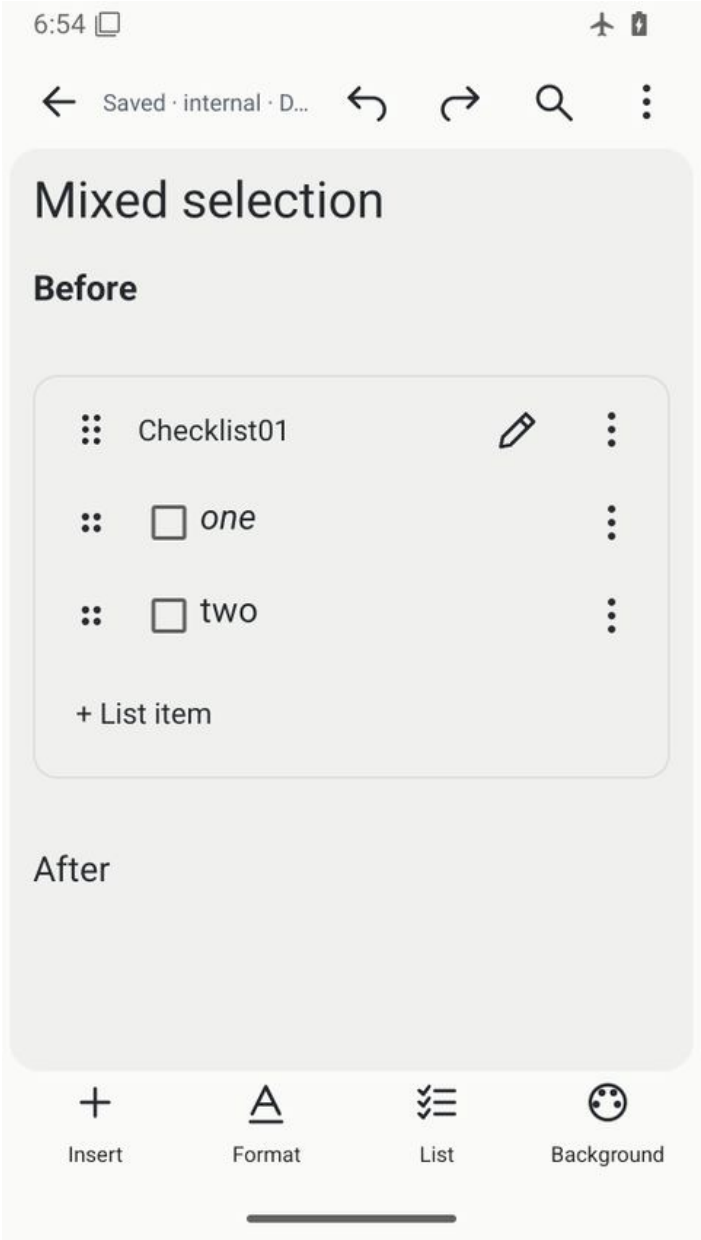

Boundary: Workspace membership is stored metadata, not reconstructed from a screenshot or a filename.

Owner: app.space.notes.CoreJourneysTest#mixedContentPropertiesComeBeforeWritingAndRemovalKeepsOtherItems
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · mixed-notes-selection

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Note > selected text > convert to checklist

Select only the lines you want in a checklist, then use the conversion action. Unselected writing before and after stays ordinary text. Inspect checked states and formatting after conversion; use Undo for a single structural reversal.

Expected / actual
Assertions in selectedNotesTextConvertsOnlySelectedRangeAndStaysInNotes.
Owner method outcome: PASS

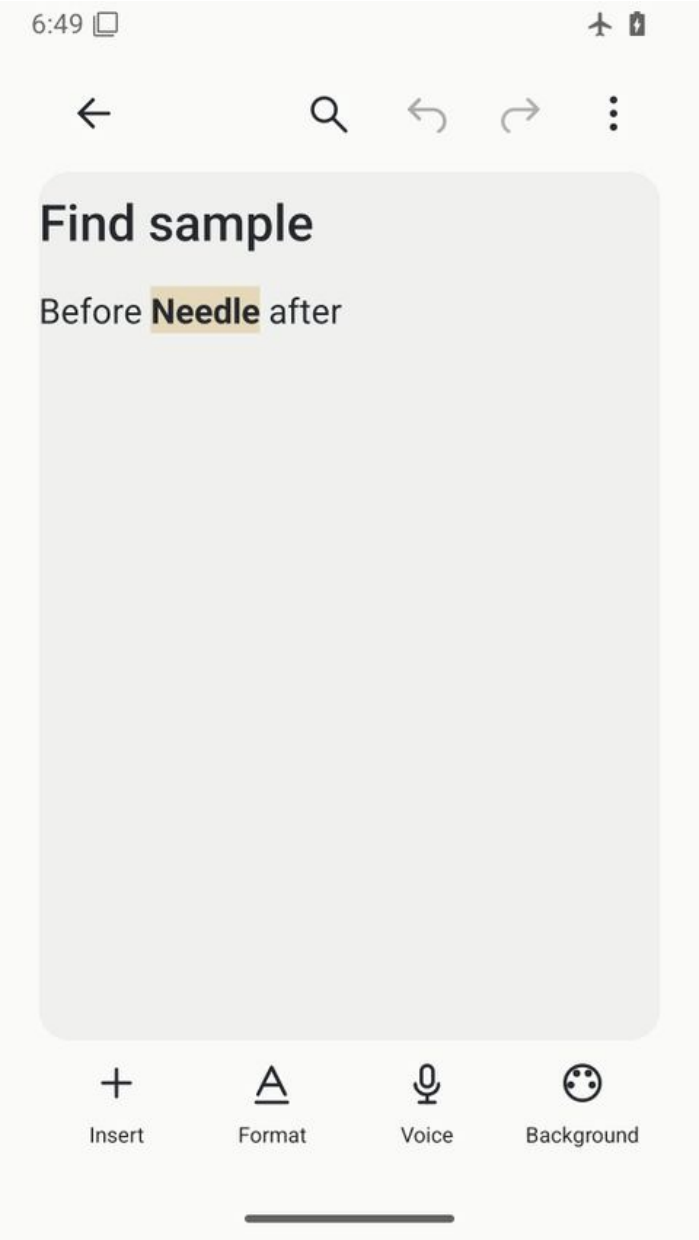

Boundary: Converting the whole note is a different operation. Do not accept a whole-document conversion as a selected-range fix.

Owner: app.space.notes.CoreJourneysTest#selectedNotesTextConvertsOnlySelectedRangeAndStaysInNotes
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · note-find-sheet

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Note editor > Find

Enter the exact phrase or a distinctive fragment. Review match counts and move through results. Find should keep writing context and not create a second duplicate search icon in the same toolbar.

Expected / actual
Assertions in findInOpenNoteSelectsExactTextWithoutChangingContent.
Owner method outcome: PASS

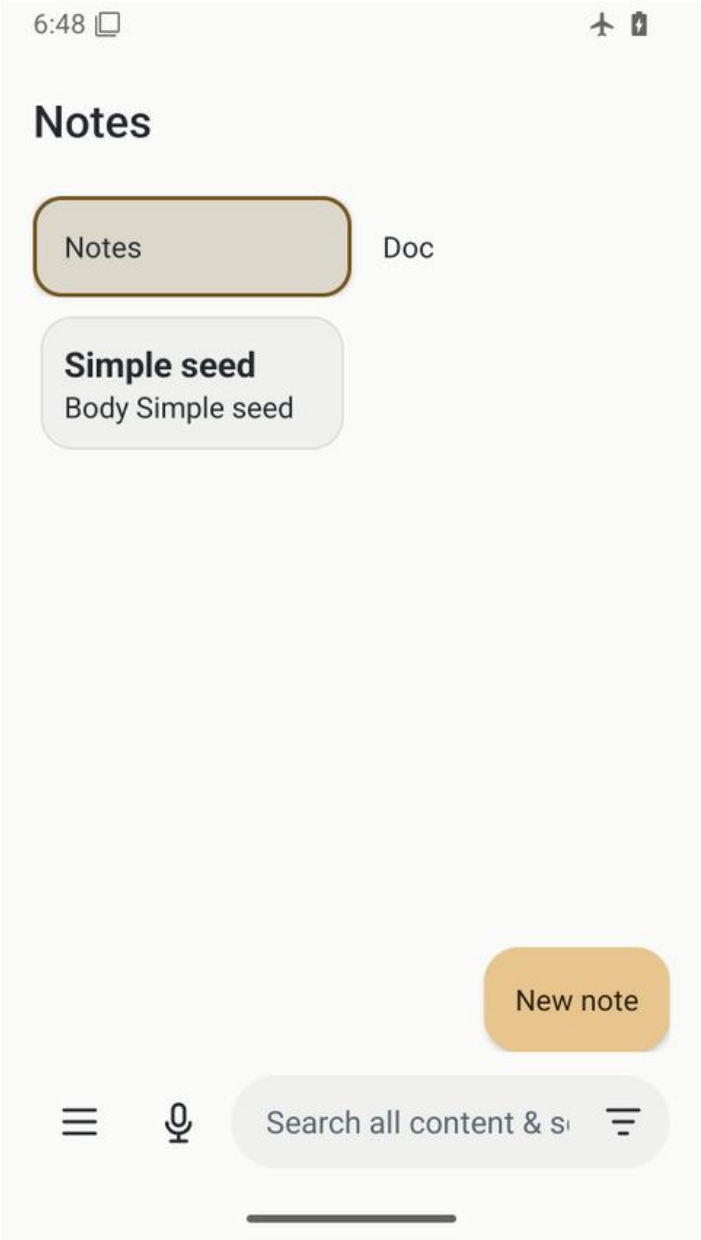

Boundary: Find does not change the text. A selection caused by Find still needs explicit editing or formatting to alter content.

Owner: app.space.notes.CoreJourneysTest#findInOpenNoteSelectsExactTextWithoutChangingContent
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Captured page · numeric-h1

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Writing > heading style

A paragraph heading changes visual hierarchy while retaining the actual numeric text. Select the intended paragraph and apply Heading1. Inspect glyph ascenders and descenders so large text is not mistaken for a clipped selection.

Expected / actual
Assertions in nativeNumericFirstLineMatchesReportedOverlapCase.
Owner method outcome: PASS

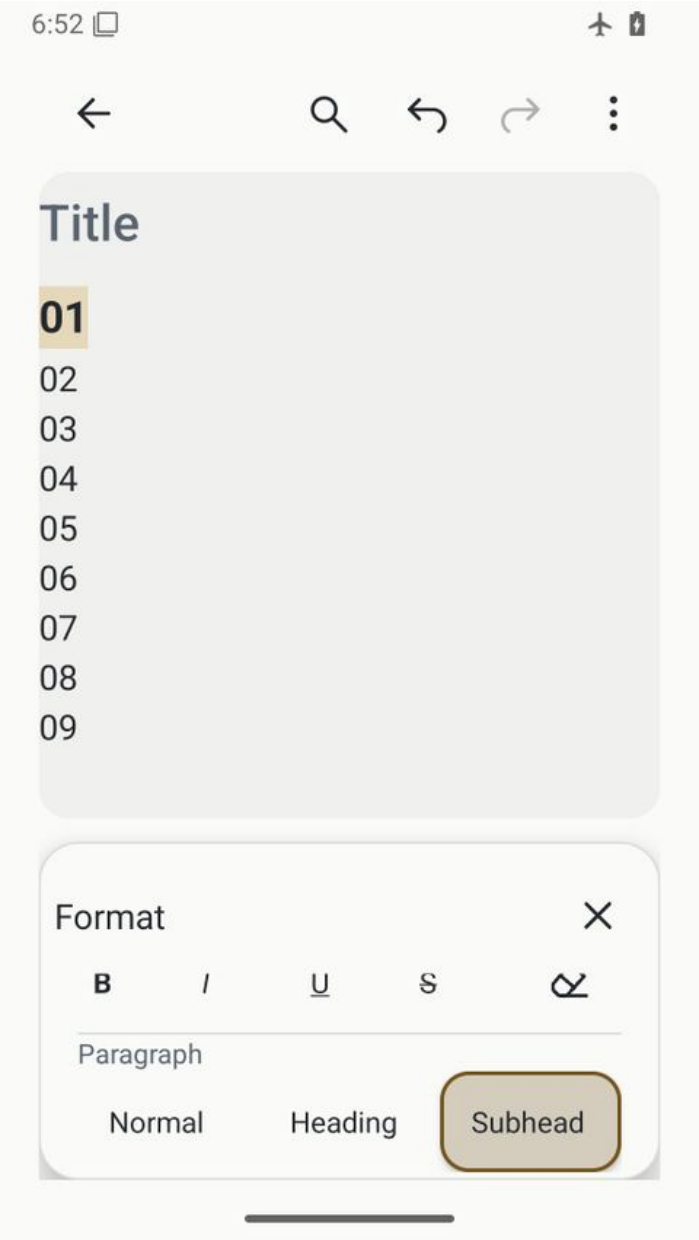

Boundary: Heading size is not automatic outline numbering. Typed numbers remain authored characters unless a list operation transforms them.

Owner: app.space.notes.CoreJourneysTest#nativeNumericFirstLineMatchesReportedOverlapCase
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · numeric-h2

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Writing > heading style

Use Heading2 for a subordinate section. Keep a consistent hierarchy within a long Doc and use Find to navigate distinctive headings. Clear returns selected text/paragraph formatting toward ordinary writing without erasing content.

Expected / actual
Assertions in nativeNumericFirstLineMatchesReportedOverlapCase.
Owner method outcome: PASS

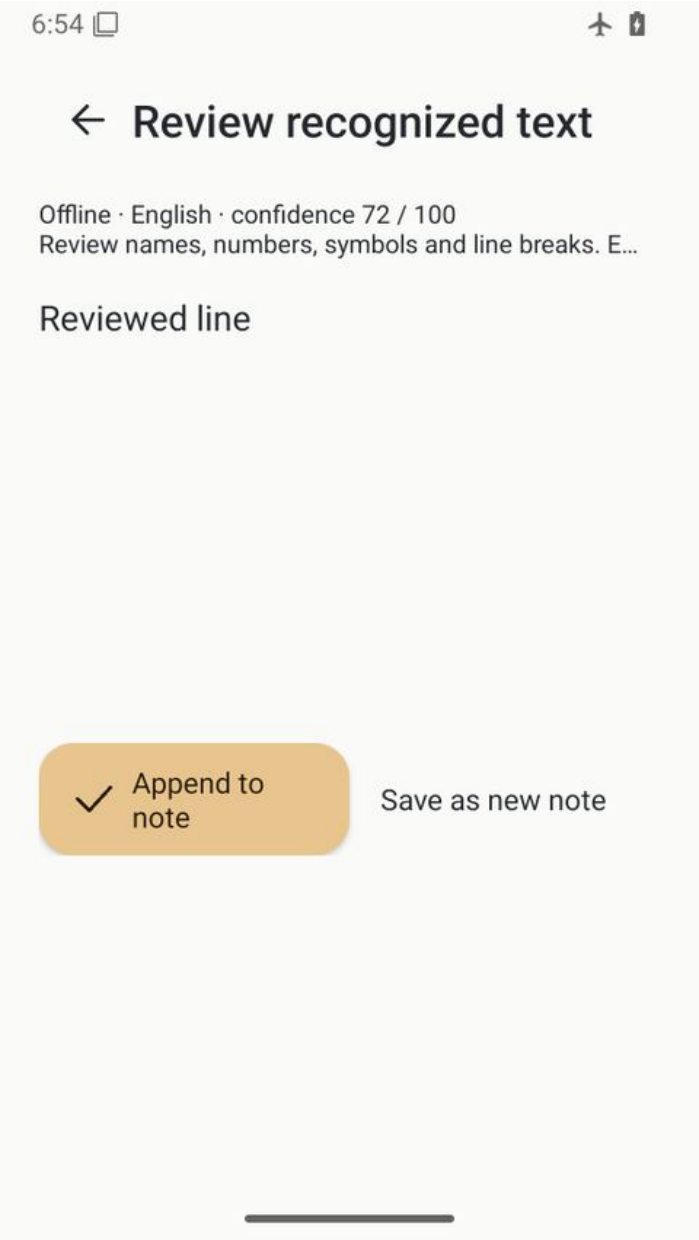

Boundary: Rendering can vary with Android fonts. Verify large text after rotation and re-opening, especially around line boundaries.

Owner: app.space.notes.CoreJourneysTest#nativeNumericFirstLineMatchesReportedOverlapCase
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · ocr-review

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Read image > review

Show editable OCR review and insertion/save choices. This UI fixture can use prepared text/regions to exercise controls; actual bundled-engine recognition is separately identified in OfflineOcrTest.

Expected / actual
Assertions in ocrReviewRequiresNonblankTextAndCancelNeverChangesTheOriginal.
Owner method outcome: PASS

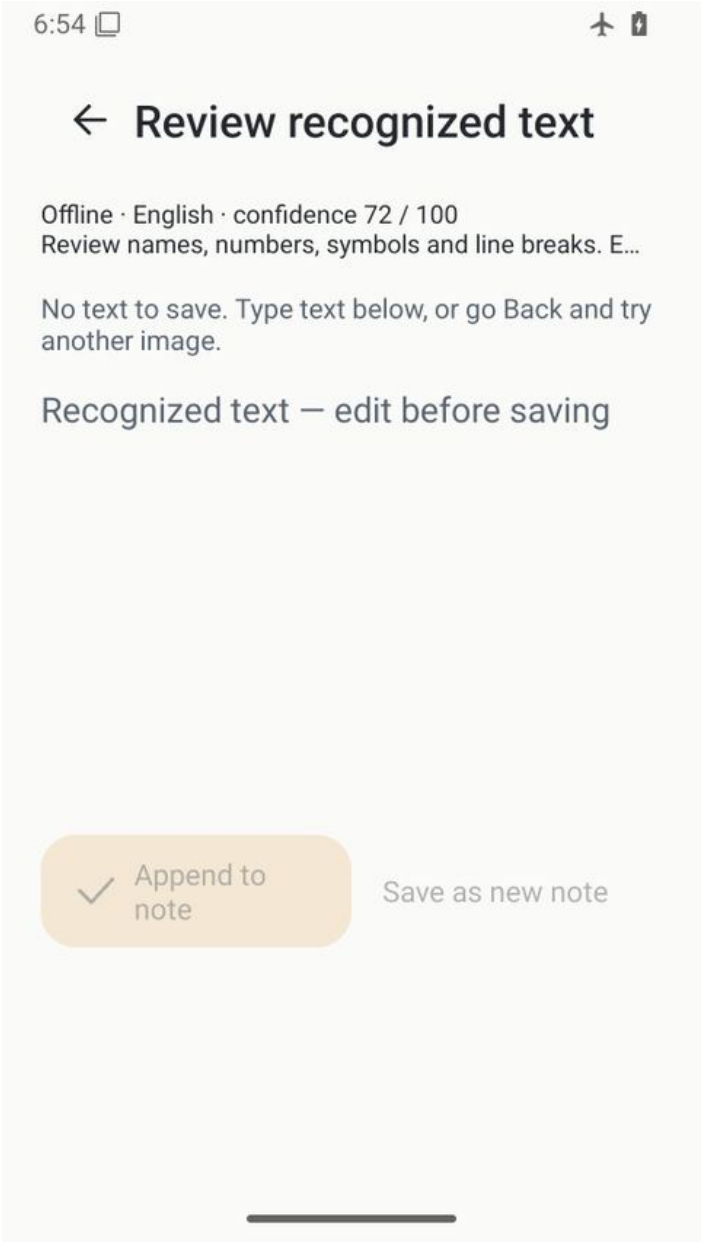

Boundary: This screenshot is not a measurement of the user's image accuracy. False-script recognition and missed text remain open physical issues.

Owner:
app.space.notes.CoreJourneysTest#ocrReviewRequiresNonblankTextAndCancelNeverChangesTheOriginal
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Actual app/Android picker state in the optional diagnostic-file saving workflow. It navigates Home, Library, Settings, Diagnostics, Android document roots and Downloads, then saves MyNotes-diagnostics.txt and verifies its bounded bytes by readback.

Expected / actual
Actual signed-release Android workflow; exact-byte source identity, recovery and file-readback assertions passed.
Signed-release workflow outcome: PASS

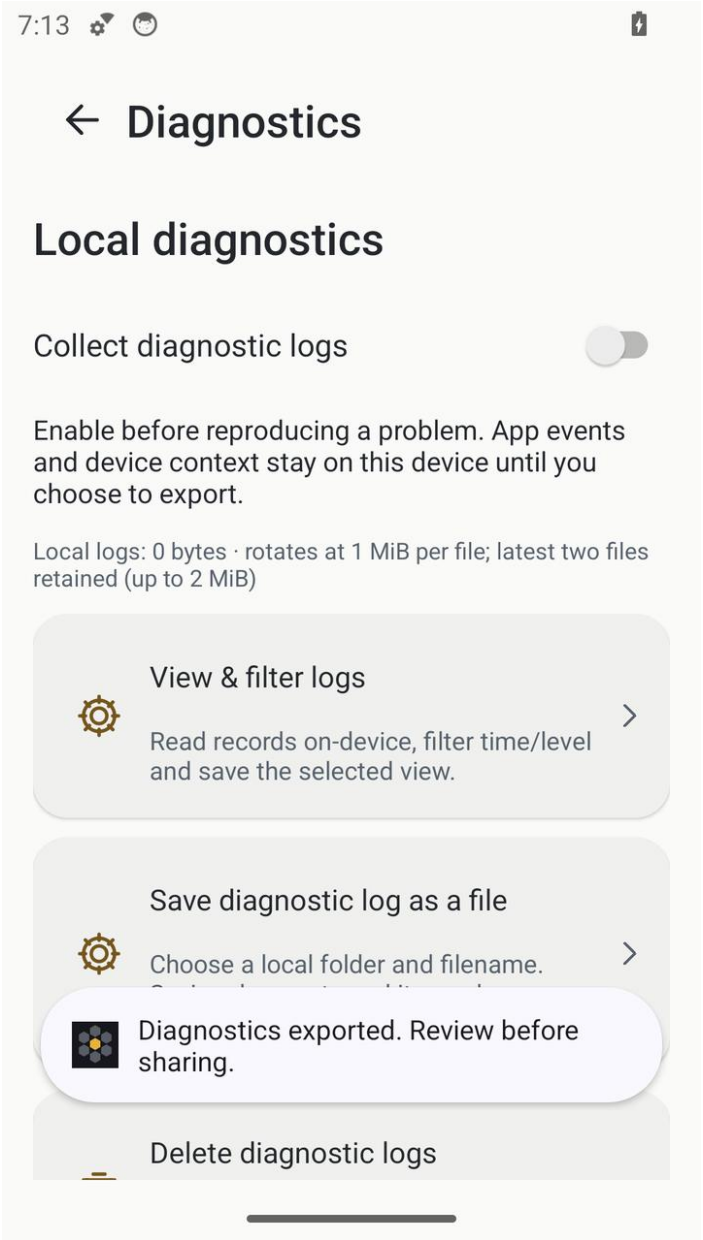

Boundary: Fresh synthetic app logs only; the saved log contents are not copied into the report. A completed whole workflow, not the screenshot alone, proves saving.

Captured page · stage-checklist-drop-preview

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Doc > checklist block grip > drag

Drag the whole checklist toward the intended writing line and use the insertion marker before releasing. Holding near an edge can scroll. A tap-to-place movement alternative can be easier on a short screen.

Expected / actual
Assertions in nativeChecklistBoxDragShowsLineAndDropsInsideRichWriting.
Owner method outcome: PASS

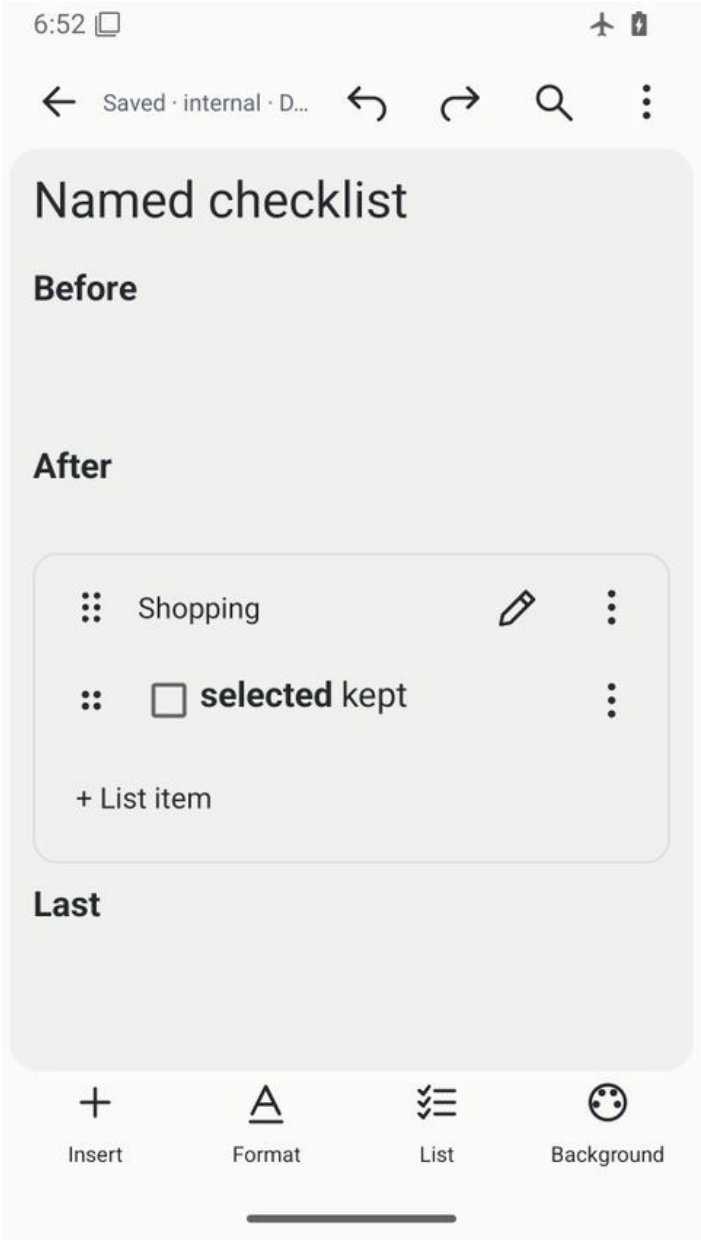

Boundary: Wrapped screen lines depend on font and width. The saved destination is a text position, not a permanent screen pixel.

Owner: app.space.notes.CoreJourneysTest#nativeChecklistBoxDragShowsLineAndDropsInsideRichWriting
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Captured page · stage-named-checklist

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Doc > checklist box name

A named checklist groups related rows inside mixed writing. Tap the name or block grip for box-level options, including rename or movement. Give the box a descriptive name that is different from its first item.

Expected / actual
Assertions in namedChecklistBoxCanMoveIntoWritingAndUndoWithoutLosingRows.
Owner method outcome: PASS

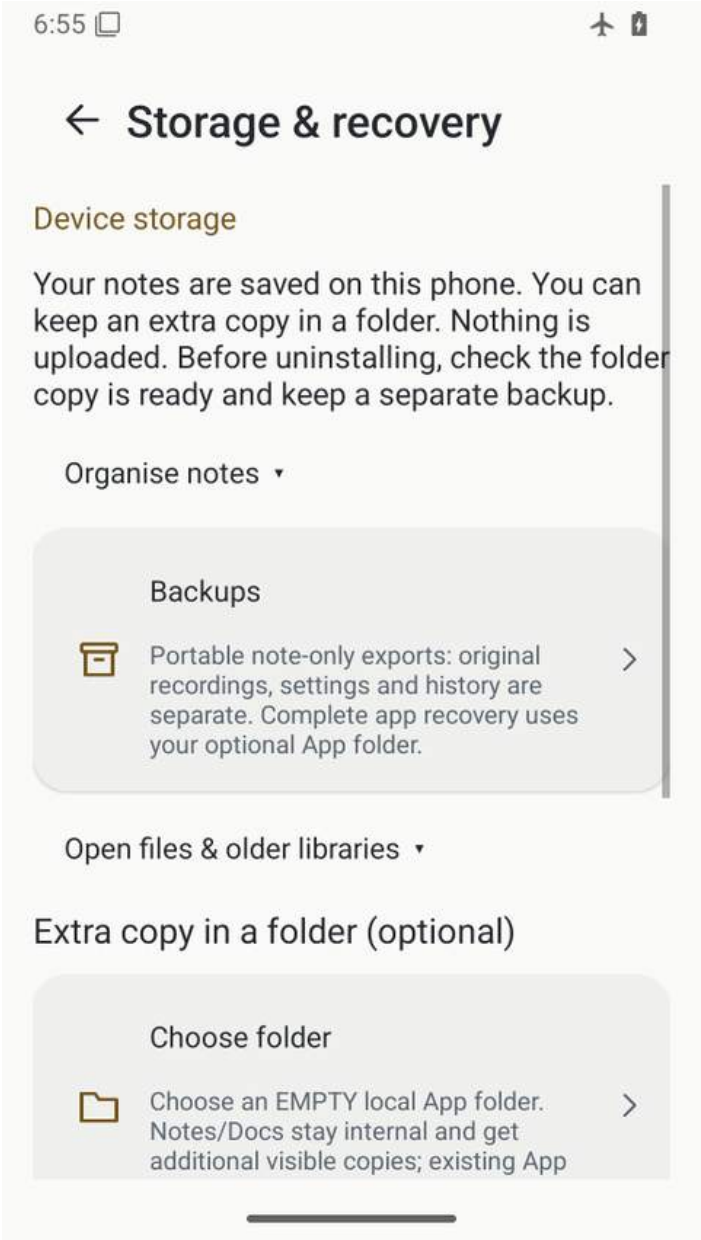

Boundary: The box name is persisted content. Unsupported older APKs may reject named blocks; do not downgrade important data.

Owner:
app.space.notes.CoreJourneysTest#namedChecklistBoxCanMoveIntoWritingAndUndoWithoutLosingRows
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Captured page · storage

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Settings > Storage & recovery

Inspect the selected storage location, recovery options and backups. A private internal copy remains the content authority. Choose/reselect a local directory through Android, preserving grants and existing user files.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

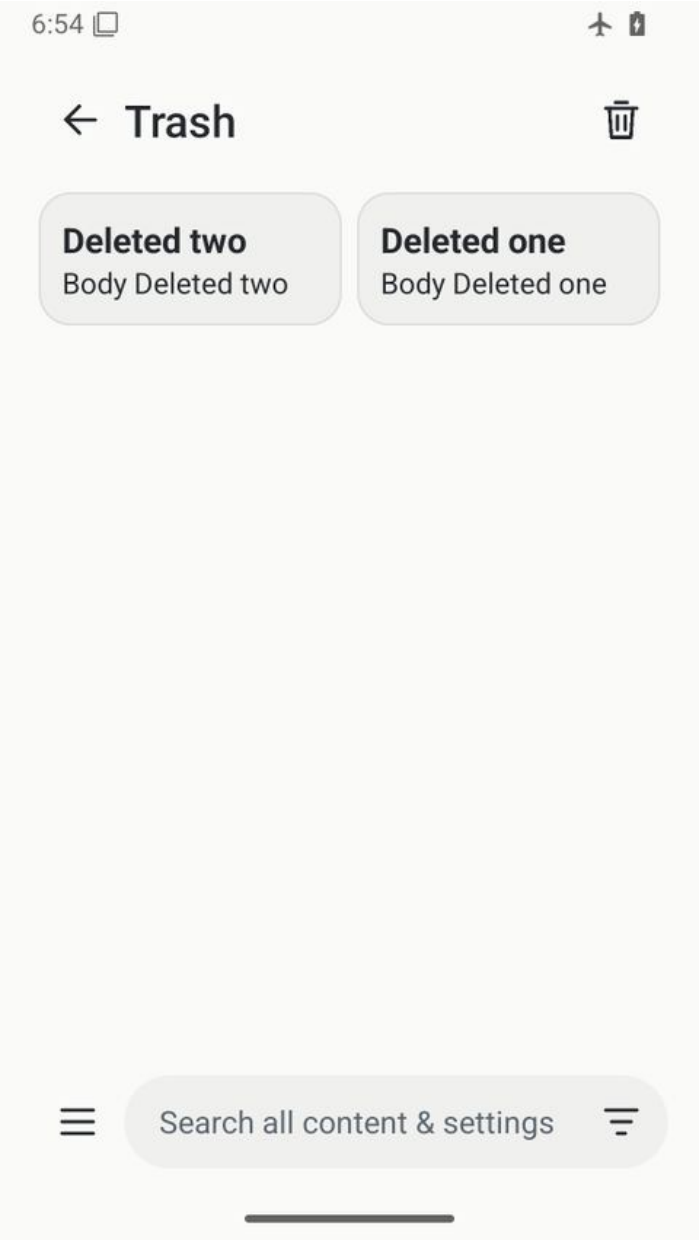

Boundary: Do not uninstall, clear app data or downgrade while migration/recovery is unverified. Provider stalls do not mean private notes vanished.

Owner:
app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · trash

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Library > Trash

Deleted notes remain recoverable for the retention period. Select an item and Restore to return it. Permanent deletion and Empty Trash are separate destructive operations with confirmation.

Expected / actual
Assertions in emptyTrashRequiresConfirmationAndKeepsLiveNotes.
Owner method outcome: PASS

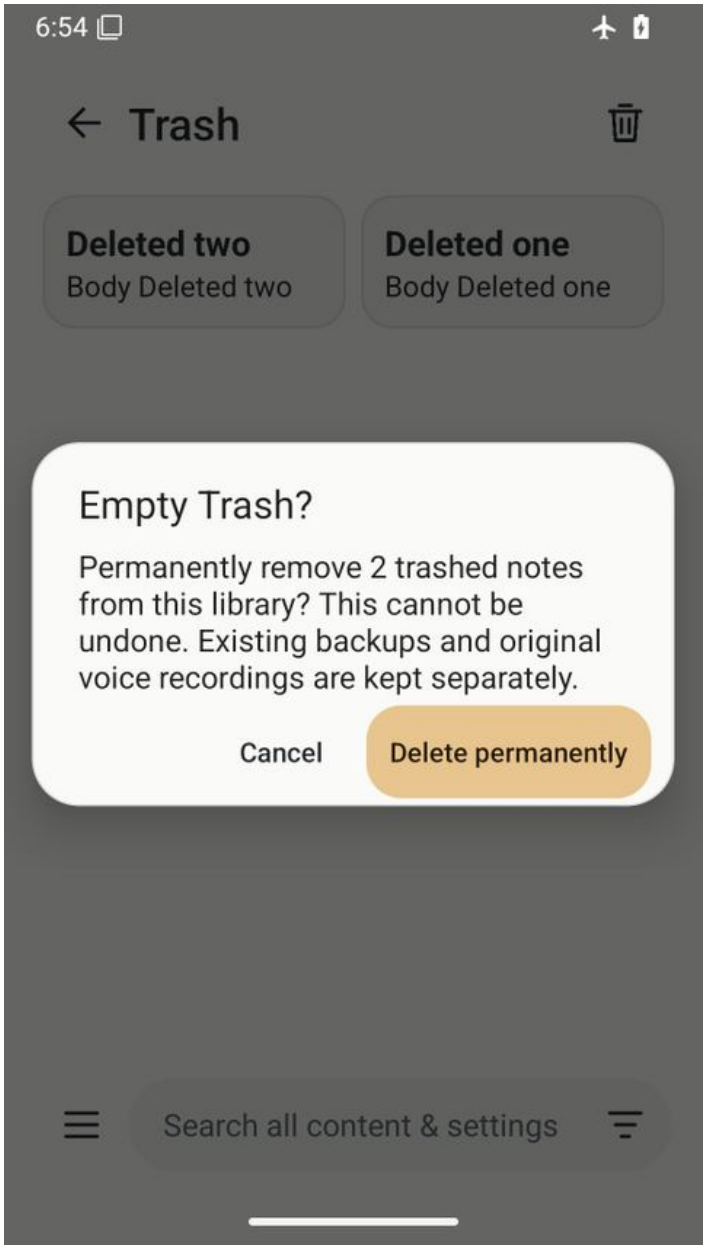

Boundary: Original voice recordings have a separate lifecycle. A deleted transcript note does not automatically mean its audio was erased.

Owner: app.space.notes.CoreJourneysTest#emptyTrashRequiresConfirmationAndKeepsLiveNotes
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · trash-confirmation

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Trash > Delete permanently / Empty Trash

Read the warning, check how many items are affected and use Cancel if unsure. Permanent deletion is not ordinary Archive or Hide checked. Export important data before purging.

Expected / actual
Assertions in emptyTrashRequiresConfirmationAndKeepsLiveNotes.
Owner method outcome: PASS

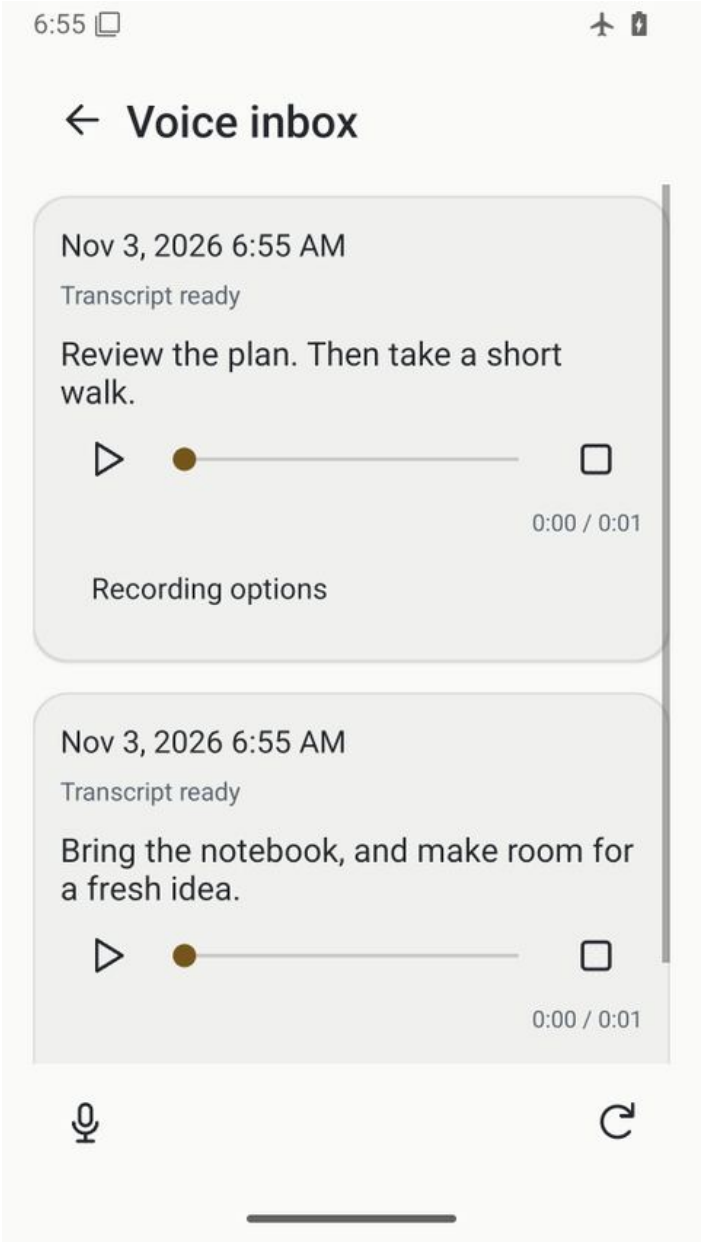

Boundary: Do not promise Undo after a confirmed permanent purge. Seven-day retention is not a backup guarantee after app-data clearing.

Owner: app.space.notes.CoreJourneysTest#emptyTrashRequiresConfirmationAndKeepsLiveNotes
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · voice-inbox

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Library > Voice inbox

Display saved synthetic recordings with play/pause, seek position and elapsed/total duration; Recording options exposes export, retry and open-note controls. The current candidate also makes the card itself toggle playback and shows Preparing playback while loading.

Expected / actual
Assertions in renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme.
Owner method outcome: PASS

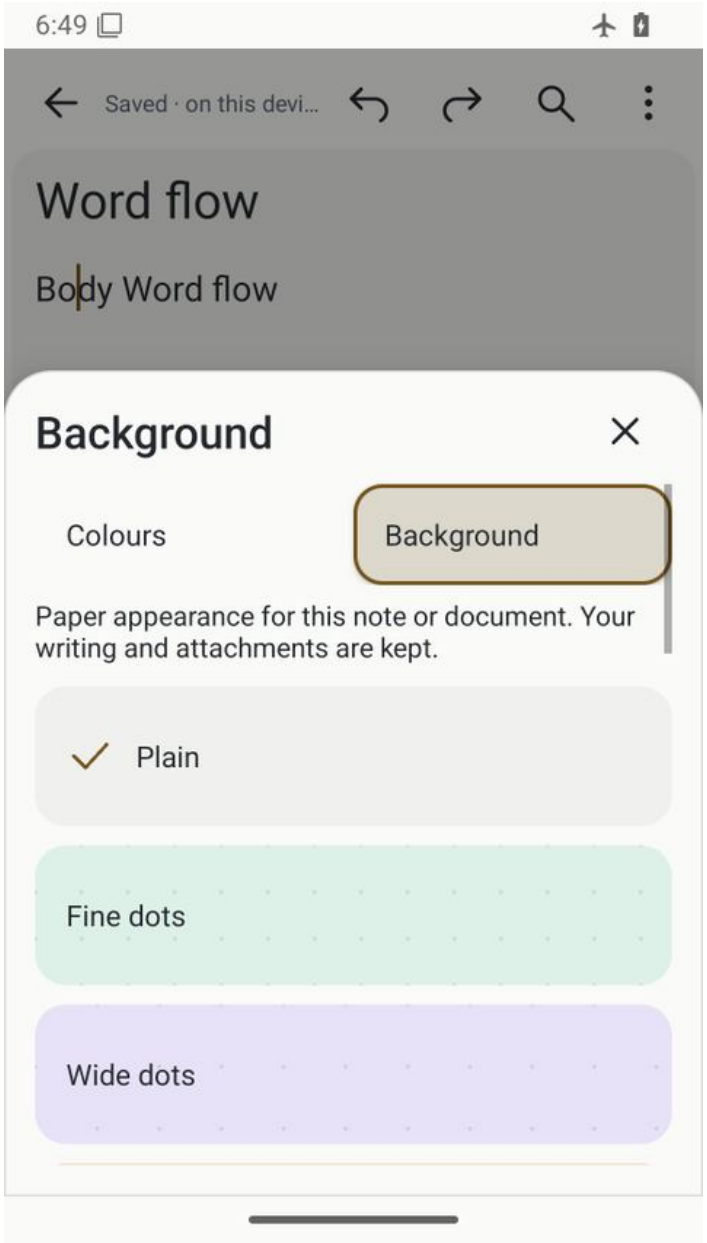

Boundary: No physical microphone quality, noise-removal, loudness or Indian-accent improvement is implied. Synthetic WAV playback is not a phone listening test.

Owner: app.space.notes.CoreJourneysTest#renderedSyntheticReviewCapturesMainSurfacesInTheRealDeviceTheme
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · word-appearance

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Doc > Appearance

Use the document appearance panel for colour/background choices. Text formatting belongs to Format and image editing belongs to its object controls. Keep a consistent page treatment when composing a multi-section Doc.

Expected / actual
Assertions in wordFlowInsertAndDocumentMenusHaveNoDuplicateTools.
Owner method outcome: PASS

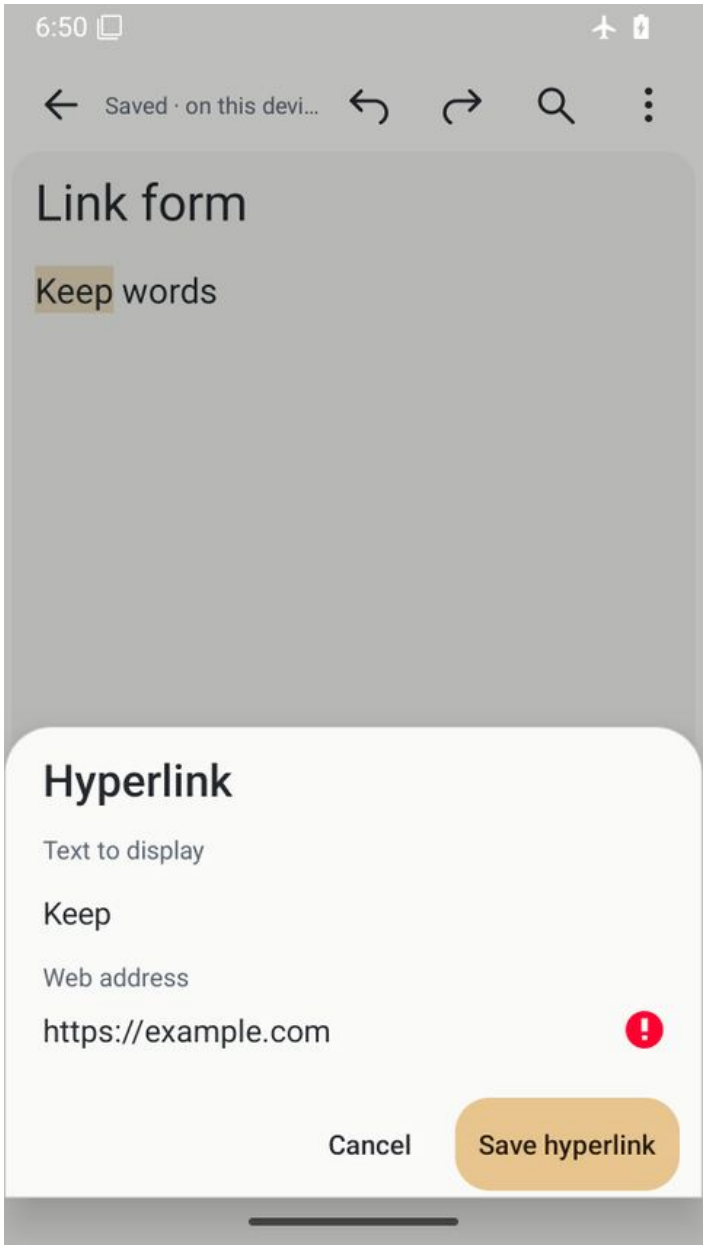

Boundary: This is native Doc appearance, not the Word original-file preview's authored page style.

Owner: app.space.notes.CoreJourneysTest#wordFlowInsertAndDocumentMenusHaveNoDuplicateTools
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Captured page · word-link-form

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Doc > Insert > Hyperlink

Select the exact words, including multiple lines when intended, then enter a safe HTTP/HTTPS address. The selected words remain visible and styled as a link; the URL is separate from their display text.

Expected / actual
Assertions in hyperlinkFormShowsBothFieldsAndCancelKeepsOriginal.
Owner method outcome: PASS

Boundary: Do not execute arbitrary URI schemes. Editing a link does not upload the note or replace the selected words with a guessed label.

Owner: app.space.notes.CoreJourneysTest#hyperlinkFormShowsBothFieldsAndCancelKeepsOriginal
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · word-synthetic-paper-page

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: DOCX prepared paper renderer > page bitmap

Render supported text, explicit breaks and a header/logo from the public DOCX fixture and check prepared page breaks and unchanged original bytes. This capture is the prepared paper bitmap, not the complete imported-file viewer chrome.

Expected / actual
Assertions in wordPreparedPagesKeepStoredBreaksHeaderLogoAndOriginalBytes.
Owner method outcome: PASS

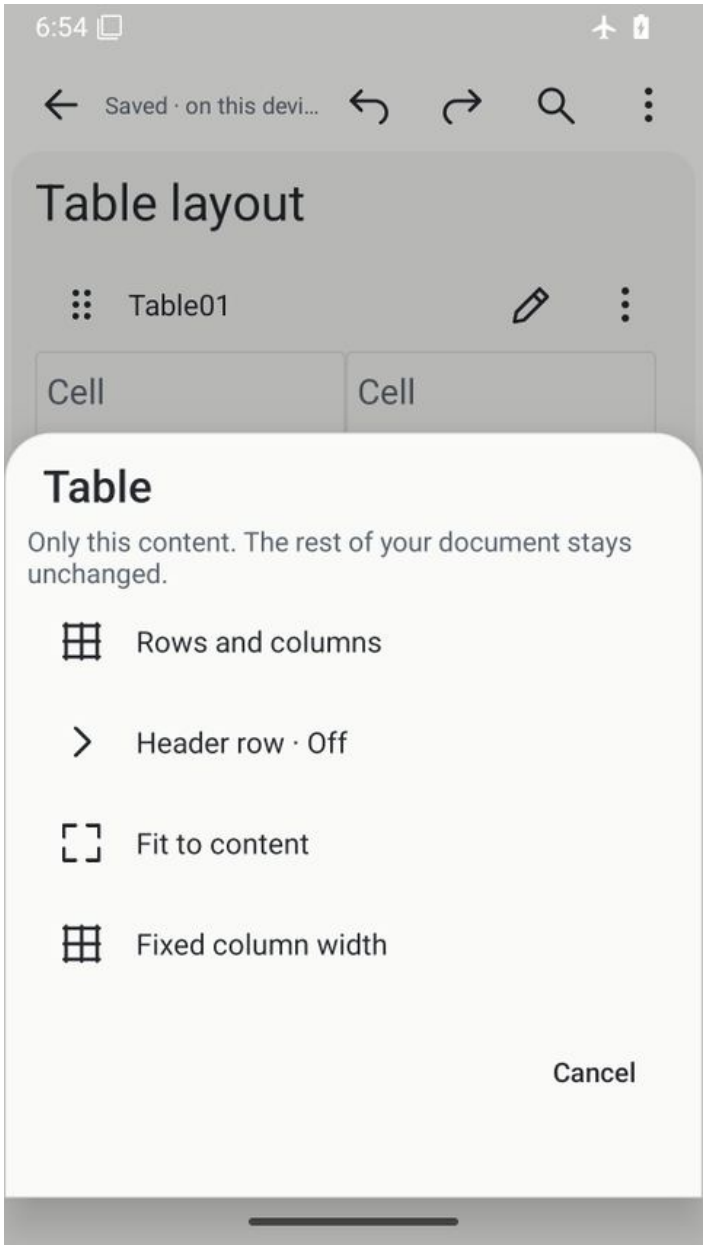

Boundary: Word remains approximate. The actual signed-release Word chooser and full viewer, including page/query recovery, are captured separately in reader-docx workflow steps.

Owner: app.space.notes.runtime.ViewedFileJourneysTest#wordPreparedPagesKeepStoredBreaksHeaderLogoAndOriginalBytes
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · word-table-options

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Doc > table options

Choose row/column changes and supported width/header options deliberately. Fit and fixed widths affect presentation. Inspect long cell text after a width change and confirm no cell contents disappeared.

Expected / actual
Assertions in tableSizingAndRightHeaderActionsPersist.
Owner method outcome: PASS

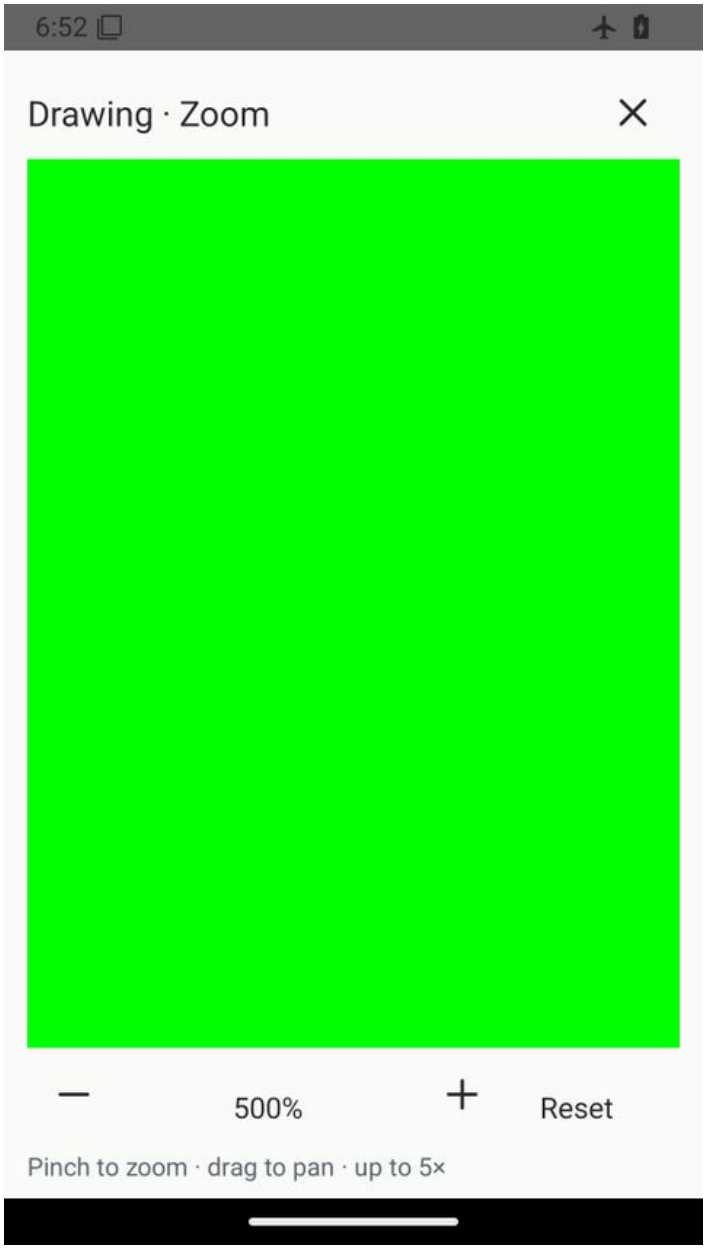

Boundary: Native Doc tables are separate from read-only Word-preview table fidelity, which remains limited.

Owner: app.space.notes.CoreJourneysTest#tableSizingAndRightHeaderActionsPersist
Shown: current-api36-b
Captured profiles: current-api36-b, min-api26-b, landscape-api34-b, large-font-api34-b

Captured page · word-zoom

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Notes/Doc > embedded image or drawing > zoom

Exercise the embedded image/drawing preview zoom limits and preserve original image pixels and drawing kind. The historical scene identifier says word-zoom, but the owning test is an embedded-visual test, not an imported Word/PDF reader test.

Expected / actual
Assertions in visualZoomLimitsDoNotChangeOriginalPixelsOrDrawingKind.
Owner method outcome: PASS

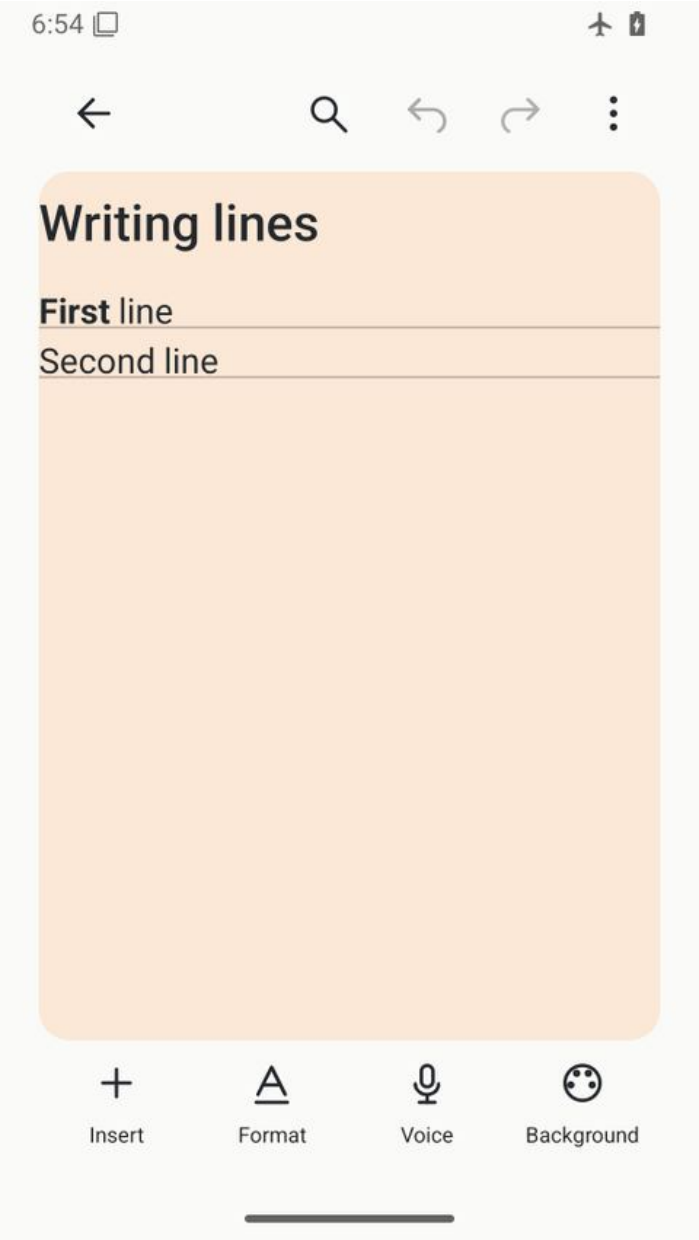

Boundary: This frame must not be presented as proof of imported Word or PDF viewer fidelity. Real signed-reader captures are reported separately.

Owner: app.space.notes.CoreJourneysTest#visualZoomLimitsDoNotChangeOriginalPixelsOrDrawingKind
Shown: current-api36
Captured profiles: current-api36, min-api26, landscape-api34, large-font-api34

Captured page · writing-lines

SYNTHETIC NATIVE EMULATOR CAPTURE · source-pinned

Route: Editor > Appearance > Writing lines

Writing backgrounds guide your eye while you type. Choose the saved background you prefer and verify text remains legible. The guides are not underscore characters and should not change copying, search or text spans.

Expected / actual
Assertions in ruledWritingGuidesUseTheSavedBackgroundWithoutChangingTextOrSpans.
Owner method outcome: PASS

Boundary: PDF printing may offer separate guide inclusion. A decorative background is not a guarantee of ruled paper in every export.

Owner:
app.space.notes.CoreJourneysTest#ruledWritingGuidesUseTheSavedBackgroundWithoutChangingTextOrSpans
Shown: current-api36-b

ViewedFileJourneysTest · illustratedHandbookExactBytesRenderAll116PagesAndHaveSelectableText · PASS
Expected: illustrated Handbook Exact Bytes Render All116Pages And Have Selectable Text.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:84 · 7 direct assertion calls (plus helpers).

ViewedFileJourneysTest · oversizedWordInlineImageFitsPaperAndKeepsFollowingText · PASS
Expected: oversized Word Inline Image Fits Paper And Keeps Following Text.
Actual PASS: 36b, 26b, L34b, F34b; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:40 · 5 direct assertion calls (plus helpers).

ViewedFileJourneysTest · pageDoubleTapZoomIsBoundedAndResetsForRecycledPages · PASS
Expected: page Double Tap Zoom Is Bounded And Resets For Recycled Pages.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:48 · 5 direct assertion calls (plus helpers).

ViewedFileJourneysTest · pageZoomRejectsNonFiniteMalformedStateAndClampsFiniteExtremes · PASS
Expected: page Zoom Rejects Non Finite Malformed State And Clamps Finite Extremes.
Actual PASS: 36b, 26b, L34b, F34b; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:66 · 4 direct assertion calls (plus helpers).

ViewedFileJourneysTest · pageZoomRestoresBeforeLayoutAndRetainsNormalizedPanAcrossResize · PASS
Expected: page Zoom Restores Before Layout And Retains Normalized Pan Across Resize.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:56 · 7 direct assertion calls (plus helpers).

ViewedFileJourneysTest · quotedCsvRetainsMultilineValuesAndNeverEvaluatesFormula · PASS
Expected: quoted Csv Retains Multiline Values And Never Evaluates Formula.
Actual PASS: 36b, 26b, L34b, F34b; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:123 · 4 direct assertion calls (plus helpers).

ViewedFileJourneysTest · spreadsheetBeyondEditorLimitKeepsWorkbookOrderAndSparsePositions · PASS
Expected: spreadsheet Beyond Editor Limit Keeps Workbook Order And Sparse Positions.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:116 · 7 direct assertion calls (plus helpers).

ViewedFileJourneysTest · spreadsheetControlsLeaveAFullDataRowVisibleWithLongNamesAndCurrentFontScale · PASS
Expected: spreadsheet Controls Leave AFull Data Row Visible With Long Names And Current Font Scale.
Actual PASS: 36b, 26b, L34b, F34b; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: spreadsheet-grid-viewport
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:20 · 13 direct assertion calls (plus helpers).

ViewedFileJourneysTest · spreadsheetTraversalAndEntityDeclarationsFailClosed · PASS
Expected: spreadsheet Traversal And Entity Declarations Fail Closed.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:127 · 0 direct assertion calls (plus helpers).

ViewedFileJourneysTest · viewedIndexFindsRealEnglishAndIndicPrefixesAndClearingNeverTouchesOriginals · PASS
Expected: viewed Index Finds Real English And Indic Prefixes And Clearing Never Touches Originals.
Actual PASS: 36b, 26b, L34b, F34b; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:131 · 9 direct assertion calls (plus helpers).

ViewedFileJourneysTest · wordPagePreviewRejectsEntitiesAndArchiveTraversal · PASS
Expected: word Page Preview Rejects Entities And Archive Traversal.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/ViewedFileJourneysTest.java:74 · 2 direct assertion calls (plus helpers).

ViewedFileJourneysTest · wordPreparedPagesKeepStoredBreaksHeaderLogoAndOriginalBytes · PASS
Expected: word Prepared Pages Keep Stored Breaks Header Logo And Original Bytes.
Actual PASS: 36b, 26b, L34b, F34b; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.

Expected: cancellation Before Late Connection Never Starts Native Work And Unbinds Once.
Actual PASS: 36a, 26a, L34a, F34a; FAIL: none; missing selected: none reported
Actions: Direct runtime/domain/Android operations; no UI-click route inferred.
Captured: NO ASSOCIATED SCREENSHOT
Source: mynotes/app/src/androidTest/java/app/space/notes/runtime/WhisperConnectionJourneysTest.java:16 · 6 direct assertion calls (plus helpers).

Literal UI-surface inventory · coverage gaps exposed

EXECUTED EVIDENCE · NOT A USER GUIDE

Every statically discoverable literal header / panel / dialog title is listed below. Dynamic titles and Android/external pages are outside this literal scan. A title in source is NOT evidence of traversal. Captured-scene associations are descriptive, not automatic approval.
